

Soft Skills

Soft skills refer to the personal qualities and social skills that enable someone to interact effectively and harmoniously with other people. They are a combination of interpersonal skills, social skills, communication skills, character traits, attitudes, career attributes, social intelligence, and emotional intelligence quotients.

Soft skills are essential for success in the workplace, and they are also important in other aspects of life. They are often difficult to develop and require practice and dedication.

Below are some of the most important soft skills:

- **Communication:** Effective communication is essential for successful relationships and interactions. This includes the ability to listen, speak, and write clearly and effectively.
- **Interpersonal Skills:** Interpersonal skills are the skills used to interact with others. This includes the ability to relate to people, build relationships, and work in teams.
- **Emotional Intelligence:** Emotional intelligence is the ability to recognize, understand, and manage emotions in oneself and others.
- **Problem-Solving:** Problem-solving is the ability to identify and resolve problems in a timely and efficient manner.
- **Adaptability:** Adaptability is the ability to adjust quickly to changing situations and environments.
- **Leadership:** Leadership is the ability to lead and motivate others to achieve a common goal.
- **Time Management:** Time management is the ability to prioritize tasks and manage one's time effectively.

Course Objectives:

1. Develop an understanding of the fundamental concepts of computer science.
2. Become familiar with the principles of programming, algorithms, and data structures.
3. Acquire knowledge of the hardware and software components of a computer system.
4. Understand the principles of operating systems, networks, and databases.
5. Develop problem solving and critical thinking skills.
6. Learn how to develop and debug software applications.
7. Develop an understanding of the ethical and legal implications of computer use.

1. Students will be enabled to understand the correct usage of grammar.

1. The basic rules of grammar are the same for all languages and can be broken down into five categories: nouns, pronouns, verbs, adjectives, and adverbs.
2. Nouns are the words used to name people, places, things, and ideas.
3. Pronouns are words used to replace nouns and can be divided into personal pronouns (I, you, he, she, it, we, they) and possessive pronouns (mine, yours, his, hers, ours, theirs).
4. Verbs are words used to describe actions, states, and occurrences.
5. Adjectives are words used to describe nouns, and adverbs are words used to describe verbs, adjectives, and other adverbs.
6. Grammar also involves the use of proper punctuation, such as commas, periods, and question marks, as well as the correct use of capitalization.
7. Additionally, grammar involves the use of proper sentence structure, which includes subject-verb agreement, verb tense, and the use of conjunctions and prepositions.

2. Students will be able to converse well with effective speaking and listening skills in English.

- Students should be able to understand the main points of conversations in English.
- Students should be able to express their ideas and opinions in English in a clear and concise manner.
- Students should be able to use appropriate grammar, pronunciation, and intonation when speaking in English.
- Students should be able to listen carefully to others and ask relevant questions to ensure understanding.
- Students should be able to use polite language when conversing with others in English.

3. Students will be able to create substantial base by the formation of strong professional

1. Professionalism is a key factor in creating a successful career. It involves developing a set of skills and attitudes that demonstrate dedication, respect, and commitment to a chosen profession.
2. Professionalism involves being reliable, responsible, and ethical in all aspects of one's job. It also involves following the rules and regulations of the profession and adhering to professional standards.
3. Professionalism also involves developing good communication skills, such as being able to effectively communicate with colleagues, clients, and customers.

4. Professionalism also involves having the ability to work independently, as well as in a team environment. It also involves the ability to take initiative and be self-motivated.
5. Professionalism also involves having the ability to solve problems and make decisions in a timely and effective manner.
6. Finally, professionalism involves having the ability to handle difficult situations and maintain a positive attitude.

Vocabulary for its application at different platforms and through numerous modes

1. **Platform:** Refers to a type of technology used to host services and applications, such as websites, mobile apps, and software.
2. **Mode:** Refers to the way in which a service or application is accessed, such as web-based, mobile, or desktop.
3. **Vocabulary:** Refers to the set of words and terms used to communicate a particular concept or idea.
4. **Application:** Refers to a software program or system designed to perform a specific task or set of tasks.
5. **Terminology:** Refers to the specialized language used to describe a particular concept or idea.

Comprehension, Reading, and Writing

1. Comprehension is the ability to understand the meaning of text. It includes the ability to identify main ideas, make inferences, and draw conclusions.
2. Reading is the process of interpreting written words and understanding their meaning. It involves recognizing words, understanding the relationships between words, and understanding the context of the text.
3. Writing is the process of creating written text. It involves organizing ideas, using language effectively, and presenting information in a clear and concise manner.

4. Student will be able to equip with basics of communication skills and will apply it for

1. Understanding the purpose of communication: It is important to understand why communication is necessary and the goal of the communication.
2. Listening: Listening is a key skill in communication. It involves understanding the message, interpreting the meaning, and responding appropriately.

3. Speaking: Speaking clearly and effectively is an important part of effective communication. It involves using the right words, tone, and body language.
4. Nonverbal communication: Nonverbal communication includes facial expressions, body language, and gestures. It is an important part of effective communication.
5. Writing: Writing is an important skill in communication. It involves using the right words, grammar, and punctuation.
6. Problem-solving: Problem-solving is an important part of communication. It involves understanding the problem, analyzing the situation, and finding the best solution.

Practical and Oral Purposes by Being Honed Up in Presentation Skills and Voice-Dynamics

- Practical purposes involve developing the ability to speak in public, to present ideas and arguments effectively, to use body language and facial expressions to convey meaning, and to use visual aids to support the spoken word.
- Oral purposes involve developing the ability to listen to and understand what is being said, to articulate ideas and opinions, to use language effectively and to respond in a manner that is appropriate to the context.
- Presentation skills involve the use of techniques such as storytelling, visual aids, and the use of humour to engage an audience.
- Voice-dynamics involve the use of intonation, pitch, volume, and other vocal qualities to convey meaning and emotion.

5. Students will be able build up personal traits that will make the transition from institution

1. Developing strong time management skills to balance academic and personal commitments.
2. Developing self-discipline and the ability to stay focused and motivated.
3. Enhancing communication and collaboration skills.
4. Improving problem-solving and critical thinking skills.
5. Learning how to work independently and in teams.
6. Developing the ability to take initiative and be proactive.
7. Enhancing self-awareness and emotional intelligence.
8. Developing a sense of responsibility and accountability.
9. Learning how to manage stress and cope with challenges.
10. Building a strong professional network.

Tips to Workplace Smoother and Excel in Your Job

1. Set clear goals and objectives. Determine what you want to accomplish and develop a plan to get there.
2. Cultivate strong interpersonal relationships with colleagues and supervisors.
3. Remain organized and stay on top of deadlines.
4. Take initiative and be proactive.
5. Develop strong communication skills.
6. Take ownership of your work and be accountable for it.
7. Improve your problem-solving skills.
8. Stay up-to-date with industry trends and developments.
9. Identify areas for improvement and develop strategies to address them.
10. Be open to feedback and use it to improve your performance.

Content Contact

1. Content contact is a form of communication between two or more parties, such as a company and its customers or a company and its suppliers.
2. Content contact is typically used to provide information, answer questions, and facilitate transactions.
3. Content contact can take place in person, over the phone, or through digital channels such as email, chat, or social media.
4. Content contact should be professional, polite, and respectful, as it is a reflection of the company's values and reputation.
5. Companies should ensure that their content contact methods are secure, accessible, and up-to-date.
6. Companies should also ensure that their content contact methods are tailored to the needs of their target audience.
7. Companies should strive to respond to content contact inquiries in a timely manner, as customer satisfaction is a key factor in any successful business.

Hours

1. An hour is a unit of time equal to 60 minutes, or 3,600 seconds.
2. It is commonly used to measure the duration of events, as well as the intervals between them.
3. In the modern world, the hour is typically divided into 60 minutes, each of which is divided into 60 seconds.
4. The hour is the base unit of time in the International System of Units (SI).
5. The hour can be abbreviated as h, hr, or hrs.
6. It is also sometimes abbreviated as hh.
7. The symbol for hour is h.
8. In some countries, the hour is divided into 100 minutes, rather than 60.
9. In this system, the hour is sometimes called a cent-hour.

10. The hour is also sometimes divided into 1,000 seconds, rather than 3,600.
11. This system is sometimes referred to as a kilosecond.

Unit-1 Applied Grammar and Usage: 8

1. Nouns: Nouns are words that refer to people, places, things, ideas, or qualities. They can be either proper nouns, which are specific and capitalized, or common nouns, which are general and not capitalized.
2. Pronouns: Pronouns are words that replace nouns in a sentence. They can be either personal pronouns, which refer to specific people or things, or indefinite pronouns, which refer to unspecified people or things.
3. Adjectives: Adjectives are words that describe or modify nouns or pronouns. They can be either descriptive adjectives, which describe the qualities of a noun or pronoun, or possessive adjectives, which indicate ownership of a noun or pronoun.
4. Verbs: Verbs are words that express an action, occurrence, or state of being. They can be either action verbs, which refer to an action taken by the subject of a sentence, or linking verbs, which connect the subject of a sentence to a noun or adjective.
5. Adverbs: Adverbs are words that modify verbs, adjectives, or other adverbs. They can be either adverbs of manner, which describe how an action is done, or adverbs of degree, which describe the intensity of an action.
6. Prepositions: Prepositions are words that indicate the relationship between two words in a sentence. They can be either simple prepositions, which refer to a specific location or time, or compound prepositions, which refer to a more complex relationship between two words.
7. Conjunctions: Conjunctions are words that join two words, phrases, or clauses together. They can be either coordinating conjunctions, which join two equal elements, or subordinating conjunctions, which join an element to a main clause.
8. Interjections: Interjections are words that express emotion or surprise. They are usually followed by an exclamation point and are not grammatically related to the rest of the sentence.

Transformation of Sentences: Simple, Compound and Complex

- Simple sentences are composed of one independent clause and no dependent clauses. They are typically short and direct.
- Compound sentences are composed of two or more independent clauses joined together with a coordinating conjunction (for, and, nor, but, or, yet, so).

- Complex sentences are composed of one independent clause and one or more dependent clauses. They are typically longer and more detailed than simple sentences.

Subject-Verb Agreement

Subject-verb agreement means that the subject and verb of a sentence must agree in number. This means that singular subjects must be paired with singular verbs and plural subjects must be paired with plural verbs.

Prefix and Suffix

Prefixes are added to the beginning of words to modify their meaning. Common prefixes include re-, un-, dis-, and mis-. Suffixes are added to the end of words to modify their meaning. Common suffixes include -able, -ment, -ly, and -ed.

Antonyms, Synonyms, Homophones

An antonym is a word that has the opposite meaning of another word. For example, the word “hot” is an antonym of the word “cold”. A synonym is a word that has the same or similar meaning as another word. For example, the words “happy” and “joyful” are synonyms. Homophones are words that sound the same but have different meanings. For example, the words “hear” and “here” are homophones.

Homonyms, New Word Formation, Select Word Power

Homonyms are words that have the same spelling and pronunciation but have different meanings.

- **Homophones** are words that have the same pronunciation but different spellings and meanings. For example, “mail” and “male” are homophones.
- **Homographs** are words that have the same spelling but different pronunciations and meanings. For example, “tear” can mean to rip something or a drop of liquid.
- **New Word Formation** is the process of creating new words. This can be done through compounding, blending, clipping, and acronyms.
- **Compounding** is the process of combining two or more words to create a new word. For example, “software” is a compound word made up of “soft” and “ware”.
- **Blending** is the process of combining two or more words to create a new word. For example, “brunch” is a blend of “breakfast” and “lunch”.
- **Clipping** is the process of shortening a word to create a new word. For example, “exam” is a clipped form of “examination”.

- **Acronyms** are words formed from the initial letters of words in a phrase. For example, “NASA” is an acronym for “National Aeronautics and Space Administration”.
- **Select Word Power** is the ability to choose the right word to express an idea or feeling accurately. This involves understanding the nuances of language and being aware of the connotations of words.

Unit-2: Listening and Speaking Skills 8

- Listening is an important skill for effective communication. It involves paying attention to what the other person is saying and understanding their message.
- Good listening skills involve being able to interpret verbal and non-verbal cues, such as body language, tone of voice, and facial expressions.
- Speaking is the act of expressing one’s thoughts and feelings through spoken words. It is important to be able to communicate effectively in order to get one’s point across.
- Good speaking skills involve being able to communicate clearly and confidently. It also involves being able to listen to others and respond appropriately.
- Effective communication is a two-way process. It involves both speaking and listening. It is important to be able to do both in order to be able to effectively communicate with others.

Active Listening: Meaning and Art of Listening, Traits of a Good Listener

- Active listening is a communication technique that involves listening carefully and attentively to what the other person is saying, while remaining respectful and non-judgmental.
- It involves paying attention to both verbal and non-verbal cues, such as body language, facial expressions, and tone of voice.
- Active listening helps build trust and understanding between people and can be used to resolve conflicts and build relationships.
- Good listeners are patient and non-judgmental. They are able to put aside their own feelings and opinions and focus on understanding the speaker’s point of view.
- Good listeners are also able to ask questions that help to clarify the speaker’s thoughts and feelings.
- Active listening requires the listener to be open-minded and willing to learn from the speaker. It is important to be aware of one’s own biases and assumptions and be willing to challenge them.

- Active listening also involves giving feedback to the speaker, such as summarizing what has been said and expressing understanding. This helps to ensure that the speaker feels heard and understood.

Listening Modes

Listening is an important skill in communication. It involves actively paying attention to what is being said, understanding it, and responding appropriately. There are different types of listening modes, such as:

- Active Listening: This involves actively engaging with the speaker and responding to their words and body language.
- Passive Listening: This involves simply hearing what is being said without actively engaging with the speaker.
- Empathic Listening: This involves listening with an understanding and empathy for the speaker's feelings and emotions.

Listening and Note Taking

When listening, it is important to be attentive and take notes. This can help you understand and remember what is being said. Taking notes can also help you to stay focused and engaged in the conversation.

Types of Listening

Listening can take many forms. It can be done in a formal setting, such as a meeting or lecture, or in a more informal setting, such as a conversation with friends. It can also involve listening to music, watching a movie, or reading a book.

Listening

Listening is an important skill in communication. It involves actively paying attention to what is being said, understanding it, and responding appropriately. Listening can help you to build relationships, understand others, and gain knowledge. It is important to practice active listening, be aware of your body language, and take notes when listening.

Techniques using Ted Talk Audio Listening with Script Reading, Pronunciation

1. Listen to Ted Talks with the script in front of you: Listening to Ted Talks with the script in front of you can help you to focus on the content and pick up on the pronunciation of words.

2. Practice pronunciation: Listening to the Ted Talk and repeating the words can help you to practice pronunciation. Try to focus on the intonation and stress of the words, as well as the individual sounds.
3. Use a dictionary: If you are unsure of how a word is pronounced, use a dictionary to look up the pronunciation. This can help you to understand the correct way to say the word.
4. Listen to the talk multiple times: Listening to a Ted Talk multiple times can help you to pick up on the pronunciation of words and the intonation of the speaker. It can also help you to understand the content of the talk better.
5. Record yourself: Recording yourself speaking the words from the Ted Talk can help you to practice pronunciation and intonation. This can help you to identify areas where you can improve.

Speaking Style; Content and Sequencing

1. Speaking style is the way in which a speaker communicates their message. It includes the tone, volume, speed, and other aspects of the speaker's delivery.
2. Content is the actual information that the speaker is conveying. It can include facts, opinions, stories, and other forms of communication.
3. Sequencing is the order in which the speaker presents the content. It is important to consider the audience's knowledge of the topic and the speaker's desired outcome when deciding on the order of the content.
4. It is important to consider the audience's needs when deciding on speaking style, content, and sequencing. The speaker should also consider their own comfort level and expertise when choosing how to present the material.

Unit-3: Reading and Writing Skills: 8

1. Reading is an important skill for academic and professional success. It is important to develop and maintain good reading habits in order to improve comprehension and understanding.
2. Developing good reading habits involves reading regularly, and reading a variety of materials. Reading different types of material can help to improve comprehension and understanding.
3. Good reading habits also involve engaging with the text. This means being actively involved in the reading process, by asking questions, making connections, and summarizing what has been read.
4. Writing is a skill that is often used in conjunction with reading. Writing helps to improve comprehension, as it allows readers to process and reflect on the information that they have read.

5. Writing also helps to improve communication skills, as it allows readers to express their ideas in a clear and concise way.
6. Good writing habits involve planning and organizing ideas before writing. It is important to plan what will be written, and to organize the ideas in a logical manner.
7. Writing also involves revising and editing. This means reading through the text and making changes to improve the clarity and accuracy of the writing.
8. Reading and writing are important skills that can be developed and improved with practice. Developing good reading and writing habits can help to improve academic and professional success.

Reading Style: Skimming; Scanning; Churning & Assimilation, Effective Writing

- Skimming is a reading technique used to quickly identify the main ideas of a text. It involves quickly scanning the text for keywords and phrases and then reading the text in fewer details.
- Scanning is a reading technique used to search for specific information or details in a text. It involves quickly moving your eyes over the text and looking for specific words or phrases.
- Churning and assimilation is a reading technique used to identify and understand the deeper meaning of a text. It involves reading the text multiple times and reflecting on it.
- Effective writing is a technique used to ensure that your written work is clear, concise and easy to understand. It involves using simple language, avoiding jargon and being mindful of the reader's needs.

Tools and Methods: Inductive Deductive; Exposition; Linear; Interrupted; Spatial

- Inductive Deductive: This method involves forming a general conclusion by looking at specific examples. It is often used in scientific or mathematical problem-solving.
- Exposition: This method involves presenting a subject in a clear and organized manner. It is often used in academic or technical writing.
- Linear: This method involves presenting information in a logical, step-by-step manner. It is often used in instructional texts.
- Interrupted: This method involves breaking up a topic into smaller parts, addressing each part in order. It is often used in persuasive writing.
- Spatial: This method involves arranging information into a visual format. It is often used in graphic design or visual presentations.

& Chronological etc, Official and Business Letter Writing, Agenda, Notices

1. Chronological Writing: Chronological writing is a type of writing that progresses in order according to time. This type of writing is often used in history, biography, and scientific writing.
2. Official and Business Letter Writing: Official and business letter writing is a form of communication used in many professional settings. It is important to use the correct tone and language when writing these letters.
3. Agenda: An agenda is a list of topics to be discussed or acted upon in a meeting. It is important to create an agenda that is organized and concise in order to ensure that all topics are addressed.
4. Notices: Notices are written documents that are used to inform people of important information. Notices can be used for a variety of purposes, including announcing events, providing updates, and more.

Minutes of Meeting

1. Meetings are an important part of any organization, providing a platform for discussion, brainstorming and decision making.
2. A meeting should have a clear purpose and agenda, which should be communicated to all participants prior to the meeting.
3. The meeting should be chaired by a person who is responsible for keeping the discussion on track and ensuring that all relevant points are discussed and decisions are made.
4. All participants should be given the opportunity to contribute to the discussion and express their opinions.
5. Minutes should be taken during the meeting to ensure that the discussion is accurately recorded and all decisions are documented.
6. The minutes should be distributed to all participants after the meeting and should include the date, time, location, participants, agenda and any decisions made.
7. Following the meeting, any action items should be distributed to the relevant people and should include a timeline for completion.

Unit-4: Presentation and Interaction Skills 8

1. Presentation and interaction skills are essential for effective communication.
2. Good presentation skills involve the ability to organize and present information clearly and concisely.
3. It also involves the ability to listen actively, ask relevant questions, and respond appropriately.
4. Good interaction skills involve the ability to maintain a professional attitude, be courteous, and show respect for the opinions of others.

5. It also involves the ability to negotiate and resolve conflicts, and to build relationships with colleagues.
6. Presentation and interaction skills can be developed through practice and feedback.
7. It is important to be aware of cultural differences when interacting with people from different backgrounds.
8. Presentation and interaction skills are important for success in the workplace and in other areas of life.

Introduction to oral communication, Nuances and Modes of Speech Delivery

- Oral communication is the process of exchanging information through speaking. It is an important form of communication, as it allows people to communicate with each other in a direct and immediate way.
- The nuances of oral communication involve many aspects, including the tone, pitch, speed, and volume of one's voice.
- Modes of speech delivery refer to the different ways in which one can deliver a speech. These include public speaking, storytelling, debate, and other forms of presentation.
- In order to be successful in oral communication, one must be able to effectively convey their message to the audience. This requires the speaker to be aware of their audience and the context of the conversation.
- It is important to remember that the nuances and modes of speech delivery can vary depending on the context and audience. Therefore, it is important to be aware of the social, cultural, and political context in order to effectively communicate your message.

Public speaking: confidence, clarity, and fluency

1. Confidence: Confidence is key in public speaking. It can be built through practice, research, and preparation. A speaker must be confident in their message and delivery.
2. Clarity: Clarity is essential in public speaking. The audience must understand the message being conveyed. This can be achieved through proper use of language, visuals, and vocal inflection.
3. Fluency: Fluency is important for any public speaking engagement. A speaker must be able to articulate their message in a clear and concise manner. This can be achieved through practice and preparation.

Individual Speaking: Elements

1. Content: The content of a speech should be tailored to the audience. A speaker should carefully consider the audience's needs and interests when crafting a speech.

2. Delivery: The delivery of a speech is also important. A speaker should use appropriate vocal inflection, gestures, and facial expressions to convey their message.
3. Presentation: The presentation of a speech should be professional and polished. A speaker should use visuals, props, and other tools to enhance their message.
4. Engagement: A speaker should engage with their audience. This can be done through eye contact, questions, and discussion.

Non verbal Communication: Kinesics, Paralinguistic features of Voice-Dynamics

- Kinesics is the study of body language, including gestures, facial expressions, and posture. It is an important part of non-verbal communication, as it conveys information about the speaker's attitude, emotions, and intentions.
- Paralinguistic features of voice-dynamics include volume, pitch, rate of speech, pauses, and vocal quality. These features can be used to express emotions, such as anger, excitement, or sadness. They can also be used to emphasize certain words or phrases.
- Non-verbal communication also includes proxemics, which is the study of how people use physical space to communicate. Proxemics includes the use of personal space, public space, and intimate space to convey different messages.
- Non-verbal communication also includes haptics, which is the study of how people use touch to communicate. Haptics includes the use of gentle touches, hugs, and handshakes to convey different messages.

Proxemics, Chronemics, and Presentation Strategies: planning, preparation

- Proxemics is the study of the physical space between people when they interact. It is important to consider the physical distance between people when delivering a presentation, as it can affect the way they perceive the message.
- Chronemics is the study of how time is used in communication. When preparing for a presentation, it is important to consider the amount of time needed to deliver the message effectively, as well as the timing of the presentation itself.
- Presentation strategies are the techniques used to deliver a presentation. These strategies can include using visual aids, engaging the audience, and using storytelling to make the presentation more effective. It is important

to plan and prepare for a presentation in order to ensure that the message is delivered effectively.

Organization, Delivery

- Organizing involves creating a structure for the delivery of a product or service. This includes the development of a plan and the creation of a process to ensure that the plan is followed.
- Delivery is the process of providing the product or service to the customer. This includes the physical delivery of the product, as well as any associated customer service and support.
- Both organization and delivery are essential components of successful business operations. Proper organization ensures that the delivery of the product or service is efficient and effective, while proper delivery ensures that the customer is satisfied with the product or service.
- Organizations must consider both the customer's needs and the organization's capabilities when developing their delivery process. This includes factors such as the type of product or service being provided, the customer's location, and the organization's resources.
- Organizations must also ensure that their delivery process is secure and reliable. This includes the use of secure payment systems, the use of reliable transportation methods, and the use of secure storage facilities.
- Finally, organizations must ensure that their delivery process is customer-friendly. This includes providing clear instructions and information to the customer, as well as providing timely customer service and support.

Unit-5: Work- place skills: 8

1. **Effective Communication:** Being able to communicate effectively with colleagues, supervisors and clients is essential for success in the workplace. This includes being able to express ideas clearly, listen well, and understand the needs of others.
2. **Problem Solving:** The ability to identify problems, analyze the causes and develop solutions is a key skill for any workplace. Problem solving involves being able to think critically, evaluate options and come up with creative solutions.
3. **Time Management:** Managing one's own time and that of others is an important skill for any workplace. This includes being able to prioritize tasks, set deadlines, and delegate responsibilities.
4. **Teamwork:** Working well with others is essential for any successful workplace. This includes being able to collaborate, share ideas, and work together towards a common goal.
5. **Leadership:** Being able to lead a team and inspire others is an important skill for any workplace. This includes being able to motivate others,

delegate tasks, and make decisions that benefit the team.

6. **Interpersonal Skills:** Being able to interact with others in a professional and courteous manner is essential for any workplace. This includes being able to build relationships, understand different perspectives, and resolve conflicts.
7. **Technology:** Knowing how to use technology to increase efficiency and productivity is an important skill for any workplace. This includes being able to use computers, software, and other tools to automate tasks and increase productivity.
8. **Adaptability:** Being able to adapt to changing circumstances and environments is an important skill for any workplace. This includes being able to adjust to new processes, technologies, and expectations.

Leadership Qualities; Impact, Communication Skills for Leaders: Listening and

1. Leadership qualities refer to the traits and characteristics that define a successful leader. These qualities typically include traits such as:
 - Integrity
 - Confidence
 - Decisiveness
 - Empathy
 - Self-awareness
 - Charisma
 - Vision
 - Adaptability
 - Communication
2. Leadership impact is the ability of a leader to influence the actions, beliefs, and attitudes of others. Leaders can have a positive or negative impact on their followers. Positive leadership impacts include:
 - Increased motivation
 - Improved communication
 - Increased productivity
 - Improved team dynamics
3. Communication skills for leaders are essential for effective leadership. Good communication skills include:
 - Active listening
 - Nonverbal communication
 - Empathy
 - Conflict resolution
 - Collaboration
 - Negotiation
 - Public speaking
 - Writing

- Facilitation
- Interviewing
- Interpersonal communication

Responding; Mental health at work place: Managing Stress; Techniques:

1. Identify sources of stress: It is important to identify the sources of stress in the workplace, such as workload, deadlines, and interpersonal relationships.
2. Develop effective coping strategies: Developing effective coping strategies to manage stress can help individuals to better handle stressful situations. This can include relaxation techniques, such as deep breathing and mindfulness, as well as problem-solving strategies.
3. Develop healthy habits: Developing healthy habits, such as getting regular exercise, eating a balanced diet, and getting enough sleep, can help to manage stress.
4. Seek support: Seeking support from family, friends, and colleagues can help to manage stress. Additionally, seeking professional help from a mental health provider can help to better manage stress.

Application of 4 A's; Avoid; Alter; Access; Adapt

1. **Avoid** - This principle is used to prevent or reduce the risk of harm. It involves avoiding situations, activities, objects, or people that may cause harm.
2. **Alter** - This approach is used to modify the environment or situation to reduce the risk of harm. It involves changing the environment, objects, or activities to reduce the risk of harm.
3. **Access** - This strategy is used to increase access to resources, services, and supports that can help reduce the risk of harm. It involves connecting individuals to resources, services, and supports that can help reduce the risk of harm.
4. **Adapt** - This approach is used to develop skills and strategies to cope with situations that cannot be avoided, altered, or accessed. It involves developing skills and strategies to cope with situations that cannot be avoided, altered, or accessed.

Course Outcomes:

- Understand the principles of software engineering and the software development life cycle
- Develop algorithms and programs to solve problems

- Analyze the correctness, completeness, and efficiency of algorithms and programs
- Design and develop software applications using appropriate software engineering principles
- Construct and evaluate user interfaces
- Understand the principles of software testing and debugging
- Apply the principles of software engineering to design and develop software applications

1. Write Professionally in Simple and Correct English

- Use correct grammar, spelling, and punctuation.
- Use clear and concise language.
- Avoid using slang or jargon.
- When writing for a professional setting, use a formal tone.
- Read over your writing before submitting it to make sure it is error-free.
- Use active voice instead of passive voice.
- Avoid using complicated words when simpler words will do.
- Use the same style of writing throughout a document.
- Proofread your work for typos and errors.
- Make sure your writing is organized and easy to follow.

2. Demonstrate Active Listening with Comprehension, and the Ability to Write Clear and Well-Structured Emails and Proposals

- Active listening involves the ability to pay attention to the speaker, understand the speaker's message, and provide feedback to show that the message has been received and understood.
- To write clear and well-structured emails and proposals, it is important to understand the purpose of the communication, the desired outcome, and the audience.
- Before writing, it is important to research the topic, determine the key points to be communicated, and create an outline.
- When writing, it is important to use a clear and concise tone, use simple language, and structure the document in a logical way.
- It is also important to proofread and edit the document to ensure that there are no errors and that the document is easy to understand.

3. Learn the use of correct body language and tone of voice to enhance communication

- Body language is a form of nonverbal communication, which includes facial expressions, posture, gestures and other physical movements.
- Tone of voice is the pitch and volume of one's voice, which can be used to convey emotions or to emphasize certain words.
- Both body language and tone of voice are important elements of effective communication, as they can help to convey a message more clearly and

accurately.

- It is important to be aware of one's body language and tone of voice when communicating with others, as they can have a significant impact on how a message is perceived.
- Being aware of one's body language and tone of voice can help to ensure that communication is effective and that the intended message is being conveyed.
- It is also important to be mindful of the body language and tone of voice of the person one is communicating with, as this can help to better understand their message.

4. Acquire the skills necessary to communicate effectively and deliver presentations with clarity

1. Develop an understanding of communication techniques, such as active listening, nonverbal communication, and questioning techniques.
2. Learn how to effectively structure a presentation, including the use of visuals, to capture the audience's attention.
3. Practice public speaking and presenting in front of an audience to build confidence.
4. Develop an understanding of the different types of communication, such as verbal, written, and nonverbal.
5. Develop an understanding of how to use language effectively, including using appropriate vocabulary and grammar.
6. Develop an understanding of how to use body language to convey a message, such as eye contact and facial expressions.
7. Develop an understanding of how to use technology, such as PowerPoint and other presentation software, to effectively deliver a presentation.
8. Develop an understanding of how to use presentation techniques, such as storytelling, to capture the audience's attention.
9. Learn how to use feedback to improve presentations.
10. Develop an understanding of how to use humor and other techniques to engage an audience.

Topic: Artificial Intelligence (AI) and Its Impact

1. AI is a branch of computer science that focuses on creating intelligent machines that can mimic human behavior and cognition.
2. AI has become increasingly popular in recent years, with applications ranging from robotics to natural language processing.
3. AI can be used to automate tasks, reduce costs, and improve efficiency.
4. AI can also be used to analyze large datasets to identify patterns and trends, and to make predictions about future events.
5. AI has the potential to revolutionize many different industries, such as healthcare, finance, and transportation.
6. However, there are also concerns about the potential implications of AI,

such as job displacement and privacy issues.

7. It is important to consider the potential risks and benefits of AI before implementing it in any context.

5. Understand and Apply Some Important Aspects of Core Skills, like Leadership and Stress

1. **Leadership:** Leadership is the ability to guide and motivate people to work together to achieve a common goal. Leadership involves setting a clear vision, providing direction, and motivating people to achieve that vision. It also involves setting expectations, providing feedback, and developing a team culture.
2. **Stress Management:** Stress management is the process of identifying, understanding, and taking action to reduce stress. It involves learning how to recognize the signs of stress, understanding the causes of stress, and developing strategies to manage stress. Strategies may include relaxation techniques, problem-solving skills, time management, and lifestyle changes.
3. **Communication:** Effective communication is essential for effective leadership. It involves understanding the needs and perspectives of others, listening actively, and expressing oneself clearly. It also involves building relationships, resolving conflicts, and negotiating with others.
4. **Decision Making:** Decision making is the process of making choices based on available information. It involves analyzing the situation, considering the options, weighing the pros and cons, and making an informed decision.
5. **Problem Solving:** Problem solving is the process of identifying and resolving problems. It involves understanding the problem, gathering information, generating solutions, evaluating solutions, and making a decision.

Management

1. Management is the process of achieving organizational goals by working with and through people and other organizational resources.
2. Management involves planning, organizing, leading, and controlling resources to achieve specific goals.
3. Planning is the process of setting objectives and determining the best course of action to achieve those objectives.
4. Organizing is the process of assigning tasks, allocating resources, and coordinating activities to achieve the goals set by management.
5. Leading is the process of motivating and inspiring individuals and teams to achieve organizational goals.
6. Controlling is the process of monitoring activities to ensure that goals are being achieved.
7. Management also involves decision-making, problem-solving, and communication.

Prescribed Books:

- **Introduction to Algorithms** by Thomas Cormen, Charles Leiserson, Ronald Rivest, and Clifford Stein: This book provides an in-depth overview of algorithms and their applications. It covers topics such as sorting, searching, graph algorithms, and string algorithms.
- **The Art of Computer Programming** by Donald Knuth: This book is a comprehensive guide to the fundamentals of computer programming. It covers topics such as algorithm design, data structures, sorting, and complexity analysis.
- **Compilers: Principles, Techniques, and Tools** by Alfred Aho, Monica Lam, Ravi Sethi, and Jeffrey Ullman: This book is a comprehensive guide to the principles, techniques, and tools of compiler construction. It covers topics such as lexical analysis, syntax analysis, code generation, and optimization.
- **Computer Networks** by Andrew Tanenbaum: This book provides an introduction to the fundamentals of computer networks. It covers topics such as network topologies, protocols, routing algorithms, and network security.
- **Computer Organization and Architecture** by William Stallings: This book provides an introduction to the fundamentals of computer organization and architecture. It covers topics such as memory organization, instruction sets, and processor design.

1. Technical Communication

Technical Communication is the process of conveying information from one person to another in an effective and efficient manner. It involves the use of written, spoken, visual, and digital media to communicate information in a clear and concise manner.

Technical Communication is used in a variety of fields such as engineering, computer science, business, and healthcare. It is an important skill for professionals to possess in order to communicate effectively with colleagues, clients, and customers.

The following are some of the key principles of Technical Communication:

1. **Clarity:** The information should be presented in a clear and concise manner, using simple language that is easy to understand.
2. **Accuracy:** All information presented should be accurate and up-to-date.
3. **Conciseness:** The information should be presented in the most concise manner possible.
4. **Organization:** The information should be organized in a logical manner, with related topics grouped together.

5. Audience: The information should be tailored to the specific audience it is intended for.
6. Style: The information should be presented in an appropriate style, such as formal or informal.
7. Tone: The tone used should be appropriate for the audience and the purpose of the communication.
8. Visual Aids: The use of visual aids such as diagrams, charts, and graphs can help to clarify complex information.

2011

- 2011 saw the Arab Spring, a series of protests and uprisings against authoritarian governments in the Middle East and North Africa.
- In 2011, the United States withdrew its last troops from Iraq, ending the war there.
- 2011 was the year that the world population reached 7 billion people.
- In 2011, the Fukushima Daiichi nuclear disaster occurred in Japan, leading to the evacuation of over 150,000 people.
- In 2011, South Sudan became the world's newest nation after gaining independence from Sudan.
- 2011 saw the death of Apple founder and CEO Steve Jobs.
- The 2011 Nobel Peace Prize was awarded to three women, Ellen Johnson Sirleaf, Leymah Gbowee, and Tawakkol Karman, for their work in promoting women's rights and peace.
- 2011 was the year that the National Football League (NFL) and the National Basketball Association (NBA) reached new labor agreements with their players.

2. Business Communication for Managers, Payal Mehra, Pearson, Delhi, 2012

1. Business communication is an essential skill for managers to possess in order to be successful.
2. It involves the exchange of ideas, information and messages between two or more people.
3. Business communication is used to build relationships, foster collaboration and create understanding.
4. It is important for managers to be able to effectively communicate their goals and objectives to their team members and colleagues.
5. Business communication also involves the use of technology such as emails, text messages, video conferencing and social media.
6. It is important for managers to be able to effectively use these tools to communicate with their team members and colleagues.
7. Good business communication also involves being able to listen actively and understand the needs of others.

8. Managers should strive to create an environment where everyone feels comfortable to express their opinions and ideas.
9. Good business communication also involves being able to clearly articulate one's thoughts and ideas.
10. It is important for managers to be able to effectively communicate with their team members, colleagues and customers.

3. Personality Development

1. The concept of personality is the unique combination of psychological characteristics that make a person distinct from others.
2. Personality is considered to be an important factor in determining an individual's behavior, attitude, and overall wellbeing.
3. Personality development is the process of improving and enhancing one's personality.
4. It involves developing positive traits such as self-confidence, self-awareness, assertiveness, and communication skills.
5. It also involves developing healthy habits such as physical activity, good nutrition, and stress management.
6. Personality development is important for leading a successful and happy life. It can help one achieve personal and professional goals.
7. According to Harold R. Wallace et. al, personality development is a life-long process. It involves understanding one's strengths and weaknesses, setting goals, and working towards them.
8. It also involves developing social skills, such as communication, empathy, and problem-solving, which are important for interacting with others.
9. Personality development also involves developing a strong sense of self-worth and a positive self-image.
10. It is important to remember that personality development is a gradual process and requires patience and dedication.

2006

- 2006 marked the beginning of the Twitter age, with the launch of the social media platform.
- In 2006, the International Astronomical Union (IAU) redefined the definition of "planet" in the Solar System, reducing the number of planets from nine to eight.
- 2006 saw the introduction of the Apple iPhone, which revolutionized the mobile phone industry.
- The 2006 FIFA World Cup was held in Germany and won by Italy, beating France in the final.
- In 2006, the United Nations adopted the International Treaty on Plant Genetic Resources for Food and Agriculture.
- 2006 saw the launch of the PlayStation 3, the seventh generation of Sony's popular video game console.

- In 2006, the United Nations declared June 5th to be World Environment Day.
- 2006 marked the 100th anniversary of the 1906 San Francisco earthquake, one of the most destructive earthquakes in US history.
- The 2006 Nobel Peace Prize was awarded to Muhammad Yunus and Grameen Bank for their efforts to create economic and social development through microcredit.

4. Practical Communication

1. Communication is a process of exchanging information, ideas, thoughts, feelings and emotions through speech, signals, writing, or behavior.
2. It is a two-way process, with both the sender and the receiver of the information being active participants in the exchange.
3. Effective communication requires that the sender and receiver have a common understanding of the message being conveyed.
4. This involves both understanding the language being used and the context in which it is being used.
5. The goal of communication is to ensure that the message is received and understood by the recipient.
6. There are various methods of communication, including verbal, non-verbal, written, and visual.
7. Verbal communication involves speaking and listening, while non-verbal communication involves body language, facial expressions, and gestures.
8. Written communication involves the use of written words, either in print or electronically, to convey a message.
9. Visual communication involves the use of images, symbols, and diagrams to convey a message.
10. Practical communication is the ability to effectively communicate in a variety of contexts and situations.
11. It involves the use of appropriate language, body language, and other communication techniques to ensure that the message is understood and received by the intended audience.
12. Practical communication also involves the ability to interpret the messages of others and respond in an appropriate manner.

Delhi 2013

1. Delhi is the capital of India and is the second most populous city in the country. It is located on the banks of the Yamuna River in northern India. It is one of India's nine union territories and is also the National Capital Territory of Delhi.
2. In 2013, Delhi was the world's second most populous city after Tokyo, with a population of over 18 million people.
3. Delhi has a long history, having been ruled by several different empires over the centuries. It was the capital of the Mughal Empire from 1556 to

1739, and was the capital of the British Raj from 1911 to 1947.

4. In 2013, Delhi was the centre of the Indian economy, with an estimated GDP of US\$167 billion. It is also a major hub for technology and services, and is home to several large multinational corporations.
5. Delhi is a major tourist destination, with a number of historical monuments and sites, such as the Red Fort, India Gate, and Humayun's Tomb. It is also home to a number of museums, galleries, and cultural centres.
6. In 2013, Delhi was the host city for the Commonwealth Games, which saw over 6,000 athletes from 71 nations competing in various sports. The event was considered a great success, and was seen as a major boost to the city's economy and infrastructure.
7. Delhi is also home to a number of universities and colleges, including the University of Delhi, Jawaharlal Nehru University, and the Indian Institute of Technology.
8. In 2013, Delhi was the host city for the World Culture Festival, a three-day event organised by the Art of Living Foundation. The event saw over 3 million people from 155 countries participating in various activities.

5. Personality Development & Soft Skills, Barun K.Mitra, Oxford University Press, New Delhi, 2012

1. **Personality Development:** Personality development is the process of developing and improving one's personality. It involves the development of positive traits and behaviors that can help a person become more successful and confident. It also involves the development of skills and abilities that can help a person to become more independent and self-sufficient.
2. **Soft Skills:** Soft skills are the skills related to communication, problem-solving, and interpersonal relationships. They are important for success in any field and are essential for career growth. Soft skills include communication, leadership, teamwork, creativity, problem-solving, and time management.
3. **Benefits of Personality Development & Soft Skills:** Personality development and soft skills can help a person to become more confident, successful, and independent. They can also help to build strong relationships and improve communication skills. Personality development and soft skills can also help a person to become more organized and better able to manage their time.

6. Public Speaking, William S. Pfeiffer, Pearson, Delhi, 2012

- Public speaking is the process of speaking to a group of people in order to inform, persuade, or entertain.
- It is a skill that requires practice and preparation in order to be effective.
- The purpose of public speaking is to communicate a message to an audience in a clear and concise manner.

- In order to be successful, a speaker must be knowledgeable about their topic and be able to engage the audience.
- The speaker should also be aware of their body language and tone of voice in order to effectively convey their message.
- Public speaking can be used in a variety of settings, from informal conversations to formal presentations.
- William S. Pfeiffer's book, *Public Speaking*, provides an in-depth look at the art of public speaking.
- The book covers topics such as audience analysis, speech preparation, delivery techniques, and more.
- It is an invaluable resource for anyone looking to improve their public speaking skills.

8. English Grammar & Usage, R.P.Sinha, Oxford University Press, New Delhi, 2005.

1. English grammar is the set of structural rules that govern the composition of clauses, phrases, and words in any given natural language.
2. The term refers also to the study of such rules, and this field includes morphology, syntax, and phonology.
3. English grammar is the system of rules that govern the use of the English language.
4. It includes the structure of words, phrases, clauses, and sentences.
5. The study of grammar is an important part of language education for students of all ages.
6. R.P.Sinha's *English Grammar & Usage* provides a comprehensive overview of the English language and its usage.
7. The book covers topics such as parts of speech, sentence structure, punctuation, and usage.
8. The book is designed to help students understand and use English grammar correctly and effectively.
9. It is an ideal resource for students preparing for exams or for anyone who wants to improve their English grammar skills.

9. English Grammar & Composition, Wren & Martin S.Chand & Co Ltd, New Delhi, 2009

- *English Grammar & Composition* is a book written by Wren & Martin and published by S.Chand & Co Ltd in New Delhi in 2009.
- It is a comprehensive guide to the study of English grammar, providing detailed explanations of the various rules of grammar and syntax.
- It also provides exercises to help the reader practice and understand the concepts better.
- The book is divided into two parts: the first part covers the basics of English grammar, such as parts of speech and sentence structure, while the second part covers more advanced topics, such as verb tenses, active

and passive voice, and other related topics.

- The book is suitable for both beginners and advanced learners of English. It is an invaluable resource for anyone who wishes to improve their English grammar and composition.

10. Soft Skills for Everyone

1. **Communication:** Effective communication is essential in any profession. It involves being able to convey ideas, thoughts, and feelings clearly and concisely. It also involves being able to listen attentively to understand the other person's point of view.
2. **Problem-Solving:** Problem-solving skills are important for both personal and professional life. It involves being able to identify and analyze problems, come up with possible solutions, and then implement the most effective solution.
3. **Time Management:** Being able to manage time effectively is important for achieving goals. It involves being able to prioritize tasks, plan ahead, and stay organized.
4. **Leadership:** Being able to lead others is a valuable skill. It involves being able to motivate and inspire others, delegate tasks, and make decisions.
5. **Teamwork:** Working as part of a team is essential in many professions. It involves being able to collaborate with others, build relationships, and work together to achieve a common goal.
6. **Adaptability:** Adaptability is the ability to adjust to new situations and environments. It involves being able to think on one's feet and come up with creative solutions.
