

Experiment 5

Aim

Draw the sequence diagram for any two scenarios.

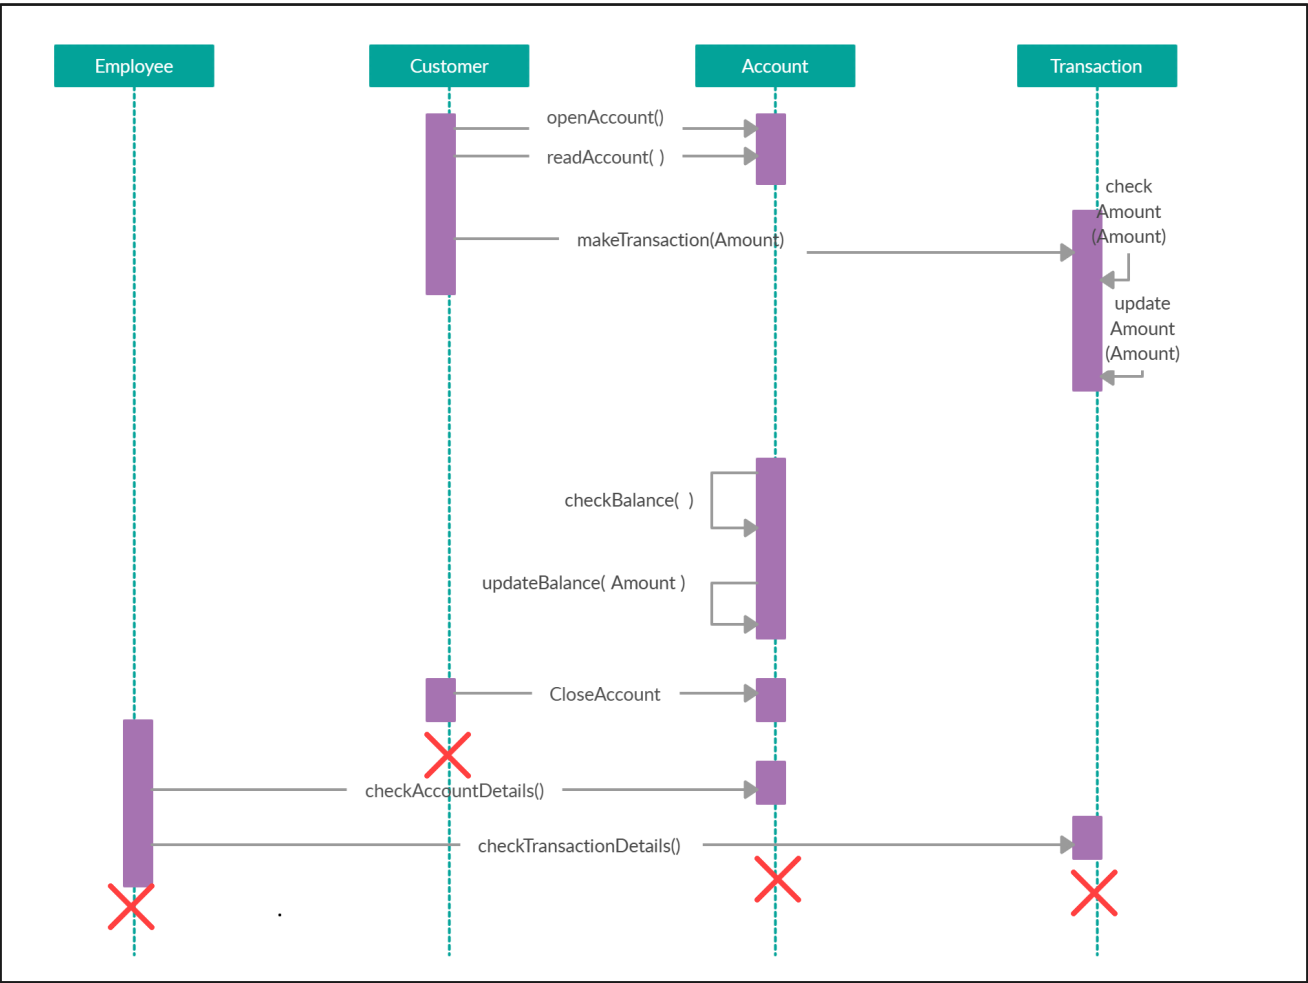

Theory

The sequence diagram is a graphical representation of the interaction between objects in a system. It is a dynamic diagram that shows the sequence of messages exchanged between objects in a system. It is used to model the dynamic behavior of a system.

The sequence diagram for the scenario of Bank Management System and Online Shopping System is shown below.

Diagram

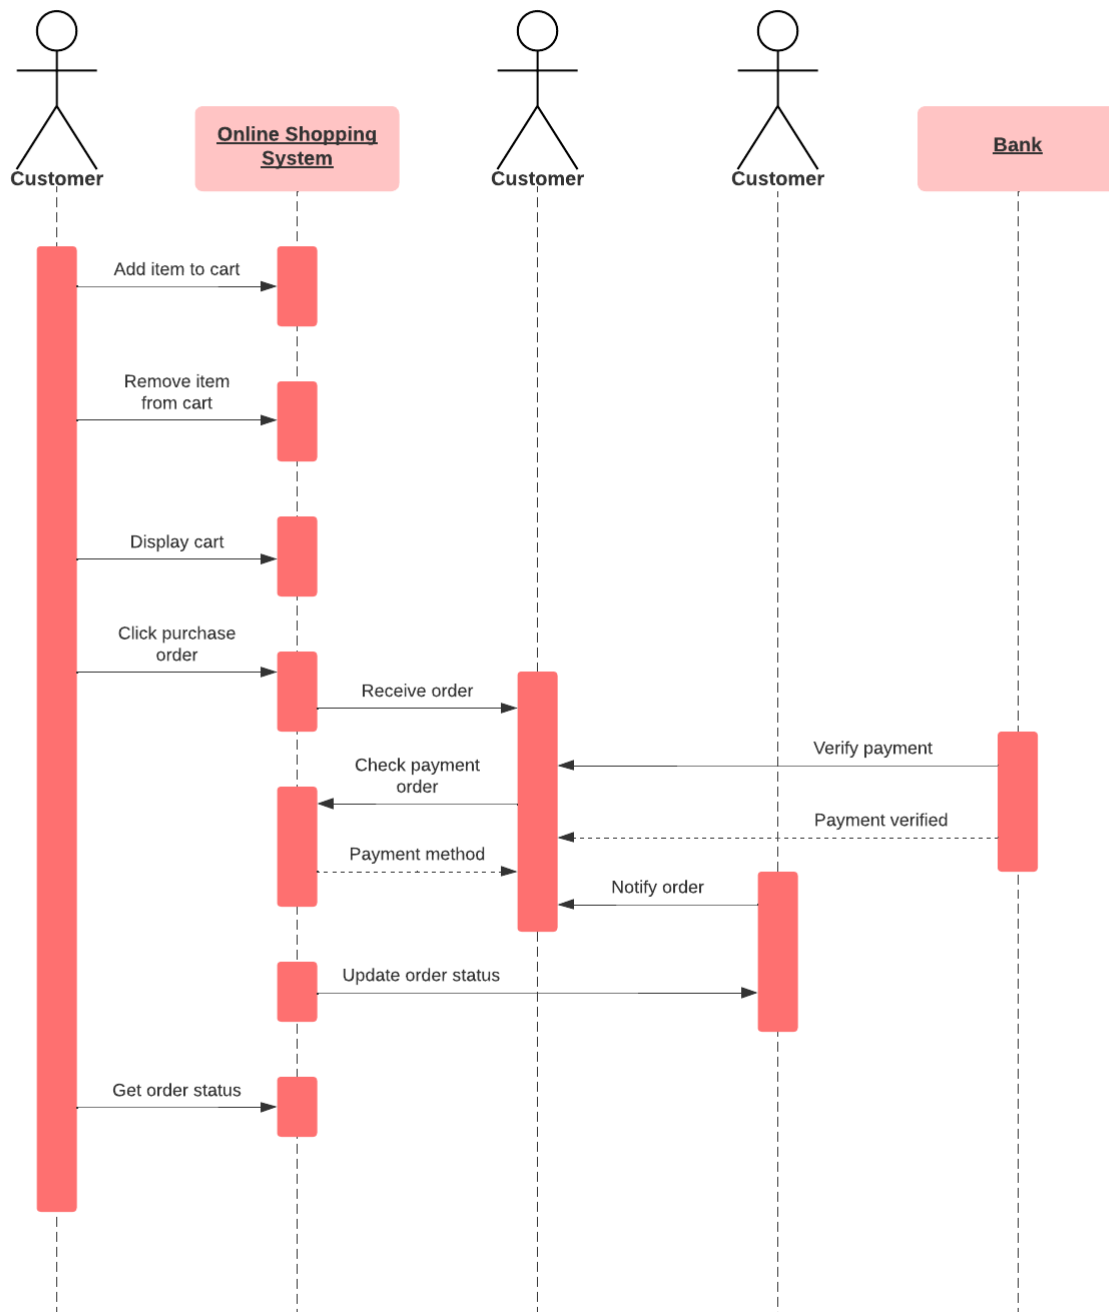

Bank Management System

Online Shopping System

Online Shopping System

CHIRAG SINGHAL | April 12, 2023

Conclusion

The sequence diagram for the Bank Management System and Online Shopping System is drawn.
