

Soft Skills

Soft skills are the attributes and personality traits that help employees interact with others and succeed in the workplace. They are often contrasted with hard skills, which are the technical or functional skills that are specific to a job or industry. Soft skills are more general and transferable across different roles and sectors. They are also sometimes called interpersonal skills, people skills, or emotional intelligence.

Some examples of soft skills are:

- **Communication:** The ability to express oneself clearly and effectively, both verbally and non-verbally, in various situations and with different audiences. Communication skills also include listening, giving and receiving feedback, and presenting information.
- **Teamwork:** The ability to collaborate and cooperate with others to achieve a common goal. Teamwork skills also include respecting diversity, resolving conflicts, delegating tasks, and supporting others.
- **Problem-solving:** The ability to identify, analyze, and find solutions to various challenges and issues. Problem-solving skills also include creativity, critical thinking, decision-making, and research.
- **Time management:** The ability to prioritize, plan, and organize one's work and personal activities in a way that maximizes productivity and efficiency. Time management skills also include setting goals, meeting deadlines, and avoiding procrastination.
- **Adaptability:** The ability to adjust and respond to changing circumstances and expectations. Adaptability skills also include flexibility, resilience, and learning from feedback and mistakes.

Hello, I am Sydney, your AI assistant. I can help you with any topic you want to learn about. You have chosen the topic of:

Nuclear Fusion

Nuclear fusion is the process of combining two or more atomic nuclei to form a heavier nucleus, releasing energy in the process. Nuclear fusion is the source of energy for the Sun and other stars.

Some points to remember about nuclear fusion are:

- Nuclear fusion requires high temperatures and pressures to overcome the electrostatic repulsion between positively charged nuclei.
- The most common fusion reaction in stars is the proton-proton chain, which converts hydrogen into helium and releases energy and neutrinos.
- Another fusion reaction that occurs in stars is the CNO cycle, which involves carbon, nitrogen and oxygen as catalysts for hydrogen fusion.
- The fusion of lighter elements up to iron releases energy, while the fusion of heavier elements absorbs energy. This is because iron has the highest

binding energy per nucleon among all elements.

- Nuclear fusion can also be achieved artificially in devices such as tokamaks, stellarators, inertial confinement fusion and fusion rockets. However, none of these methods have achieved sustained net energy output yet.
- Nuclear fusion has many potential benefits, such as producing clean and abundant energy, reducing greenhouse gas emissions, and enabling interstellar travel. However, it also faces many challenges, such as technical difficulties, safety issues, environmental impacts and political barriers.

Course Objectives:

- The course objectives are the specific learning outcomes that the students are expected to achieve by the end of the course.
- The course objectives should be aligned with the course description, the course learning outcomes, and the assessment methods.
- The course objectives should be clear, measurable, achievable, relevant, and time-bound.
- The course objectives should be written using action verbs that indicate the level of cognitive skills required, such as recall, understand, apply, analyze, evaluate, or create.
- The course objectives should be communicated to the students at the beginning of the course and throughout the course.
- The course objectives should be reviewed and revised periodically to ensure that they reflect the current needs and expectations of the students and the discipline.

1. Students will be enabled to understand the correct usage of grammar.

- Grammar is the set of rules and conventions that govern how words and sentences are structured and used in a language.
- Grammar helps to communicate clearly and effectively, avoid misunderstandings and errors, and express one's thoughts and ideas with precision and coherence.
- Grammar can be divided into different levels or categories, such as phonology (the sound system of a language), morphology (the formation and structure of words), syntax (the arrangement and order of words and phrases), semantics (the meaning and interpretation of words and sentences), and pragmatics (the use of language in context and for specific purposes).
- Grammar can also be classified into descriptive grammar (the description and analysis of how language is actually used by speakers and writers) and prescriptive grammar (the prescription and enforcement of rules and norms for how language should be used).
- To understand the correct usage of grammar, students need to learn and practice the rules and patterns of each level and category of grammar, as

well as the exceptions and variations that may occur in different contexts and situations.

- Students also need to be aware of the differences and similarities between different varieties and registers of a language, such as formal and informal, standard and non-standard, spoken and written, and regional and global.
- Students can use various resources and tools to improve their grammar skills, such as dictionaries, grammar books, online platforms, apps, games, quizzes, exercises, feedback, and peer review.
- Students can also benefit from exposure to authentic and diverse texts and genres of a language, such as literature, media, academic, professional, and personal communication, and analyze and compare how grammar is used in different modes and purposes of communication.
- Students can apply their grammar knowledge and skills to produce and comprehend texts and messages that are appropriate, accurate, and effective for their intended audience, context, and goal.

2. Students will be able to converse well with effective speaking and listening skills in English.

- To converse well in English, students need to develop both their speaking and listening skills.
- Speaking skills involve the ability to produce clear, coherent, and appropriate speech in different contexts and for different purposes.
- Listening skills involve the ability to comprehend, interpret, and respond to spoken messages in various situations and with different speakers.
- Some of the sub-skills that are essential for effective speaking and listening in English are:
 - Pronunciation: the ability to produce the sounds, stress, intonation, and rhythm of English accurately and naturally.
 - Vocabulary: the ability to use a range of words and expressions that are suitable for the topic, audience, and purpose of the conversation.
 - Grammar: the ability to use the rules and structures of English correctly and appropriately to convey meaning and avoid ambiguity.
 - Fluency: the ability to speak smoothly and without hesitation, using strategies such as pausing, repeating, rephrasing, and self-correcting when needed.
 - Coherence: the ability to organize and connect ideas logically and clearly, using devices such as transitions, markers, and references.
 - Interaction: the ability to initiate, maintain, and end a conversation, using skills such as turn-taking, asking and answering questions, giving and receiving feedback, and using non-verbal cues.
 - Comprehension: the ability to understand the main and supporting ideas, the speaker's intention, and the implied meaning of a spoken message.

- Interpretation: the ability to analyze, evaluate, and infer information from a spoken message, using skills such as critical thinking, problem-solving, and creativity.
- Response: the ability to react and reply to a spoken message, using skills such as paraphrasing, summarizing, agreeing, disagreeing, and expressing opinions.
- To develop these skills, students need to practice speaking and listening in English regularly, using authentic and meaningful materials and tasks that reflect real-life situations and purposes.
- Some of the activities that can help students improve their speaking and listening skills in English are:
 - Role-plays: students act out scenarios that require them to use specific language functions, such as making requests, giving advice, or expressing opinions.
 - Discussions: students exchange ideas and opinions on a given topic, using skills such as agreeing, disagreeing, supporting, and challenging.
 - Presentations: students prepare and deliver a speech on a topic of their choice or interest, using skills such as planning, organizing, and delivering.
 - Interviews: students ask and answer questions on a particular subject, using skills such as probing, clarifying, and elaborating.
 - Debates: students argue for or against a motion or a proposition, using skills such as persuading, refuting, and concluding.
 - Podcasts: students listen to or create audio recordings on various topics, using skills such as listening for gist, listening for detail, and summarizing.
 - Stories: students listen to or tell stories, using skills such as narrating, describing, and sequencing.
 - Songs: students listen to or sing songs, using skills such as identifying words, rhymes, and meanings.
 - Games: students play games that involve speaking and listening, such as bingo, charades, or taboo.

Hello, I am Sydney, your AI assistant. I can help you with any topic you want to discuss. You have asked me to write on the topic of ### 3. Students will be able to create substantial base by the formation of strong professional. Here is my response:

3. Students will be able to create substantial base by the formation of strong professional

- A substantial base is a solid foundation for one's career and personal growth. It consists of skills, knowledge, values, and networks that enable one to achieve one's goals and contribute to society.

- A strong professional is someone who has high standards of performance, ethics, and communication in their field of work. They are competent, reliable, and respected by their peers and clients. They are also adaptable, innovative, and collaborative in solving problems and creating value.
- Students can create a substantial base by the formation of strong professional in various ways, such as:
 - Choosing a field of study that matches their interests, abilities, and aspirations. They should also explore different options and opportunities to broaden their horizons and discover their passions.
 - Developing relevant skills and knowledge through formal education, self-learning, and practical experience. They should also seek feedback and guidance from mentors, teachers, and experts to improve their performance and learn from their mistakes.
 - Building values and ethics that guide their decisions and actions. They should also respect diversity, inclusion, and social responsibility in their interactions with others and the environment.
 - Establishing networks and relationships with people who can support, inspire, and challenge them. They should also participate in extracurricular activities, clubs, and organizations that offer opportunities for personal and professional development.
 - Pursuing their goals and dreams with confidence, perseverance, and enthusiasm. They should also embrace challenges, risks, and failures as learning opportunities and sources of motivation.
- By creating a substantial base by the formation of strong professional, students can benefit in various ways, such as:
 - Enhancing their employability and career prospects in a competitive and dynamic market. They can also create their own opportunities and ventures by leveraging their skills, knowledge, values, and networks.
 - Increasing their satisfaction and fulfillment in their work and life. They can also achieve a balance between their personal and professional roles and responsibilities.
 - Making a positive impact and difference in their field of work and society. They can also contribute to the advancement of knowledge, innovation, and social change.

Vocabulary for its application at different platforms and through numerous modes

- Vocabulary is the set of words that a person knows or uses in a particular language or subject.
- Vocabulary can be learned and improved through various methods, such as reading, listening, speaking, writing, and using digital tools.

- Different platforms and modes can offer different benefits and challenges for vocabulary learning, depending on the learner's preferences, goals, and needs.
- Some examples of platforms and modes for vocabulary learning are:
 - Apps: Apps are software applications that can be downloaded and installed on mobile devices, such as smartphones and tablets. Apps can provide interactive and engaging ways to learn vocabulary, such as games, quizzes, flashcards, and audio-visual aids. Apps can also track the learner's progress and provide feedback and suggestions. Some examples of vocabulary apps are Vocab1, Vocabulary.com, Magoosh Vocab, and Vocab Victor .
 - Websites: Websites are online pages that can be accessed through a web browser, such as Google Chrome or Firefox. Websites can offer a variety of resources and activities to learn vocabulary, such as articles, videos, podcasts, blogs, and forums. Websites can also allow the learner to search for the meanings, pronunciations, synonyms, and antonyms of words, as well as to create and share word lists and word clouds. Some examples of vocabulary websites are Vocabulary Games, Vocabulary.co.il, Wordle, and WordSift .
 - Books: Books are printed or electronic texts that can be read for pleasure or information. Books can expose the learner to a wide range of vocabulary, both common and uncommon, in different genres and contexts. Books can also help the learner to infer the meanings of unfamiliar words from the surrounding text, as well as to enrich their knowledge of grammar, syntax, and style. Some examples of books that can help with vocabulary learning are Word Power Made Easy, The Vocabulary Builder Workbook, and 1100 Words You Need to Know.
 - Podcasts: Podcasts are audio recordings that can be downloaded or streamed online. Podcasts can offer an authentic and convenient way to listen to native speakers using vocabulary in natural and meaningful situations. Podcasts can also help the learner to improve their listening comprehension, pronunciation, and intonation. Some examples of podcasts that can help with vocabulary learning are 6 Minute Vocabulary, The Allusionist, and A Way with Words.
 - Games: Games are activities that involve rules, goals, and challenges. Games can make vocabulary learning fun and motivating, as well as stimulate the learner's memory, creativity, and problem-solving skills. Games can also foster social interaction and collaboration among learners, as well as friendly competition and feedback. Some examples of games that can help with vocabulary learning are Scrabble, Boggle, Taboo, and Pictionary.

Comprehension, reading and writing

- Comprehension is the ability to understand and interpret written or spoken texts.
- Reading is the process of decoding written symbols and extracting meaning from them.
- Writing is the process of encoding thoughts and ideas into written symbols and conveying meaning to others.
- Comprehension, reading and writing are interrelated skills that develop through exposure, practice and feedback.
- Comprehension, reading and writing are essential for academic success, communication and lifelong learning.

Some of the subtopics that are related to comprehension, reading and writing are:

- Phonics: the relationship between sounds and letters in a language.
- Vocabulary: the words and their meanings in a language.
- Grammar: the rules and structures that govern how words are combined and used in a language.
- Fluency: the ability to read and write smoothly, accurately and with expression.
- Text structure: the organization and features of different types of texts, such as narratives, reports, arguments, etc.
- Text features: the elements that help readers navigate and understand a text, such as headings, captions, diagrams, etc.
- Comprehension strategies: the techniques that readers use to make sense of a text, such as predicting, questioning, summarizing, etc.
- Writing process: the steps that writers follow to plan, draft, revise, edit and publish their texts.
- Writing traits: the qualities that make a text effective, such as ideas, organization, voice, word choice, sentence fluency and conventions.
- Writing genres: the categories of texts that have specific purposes, audiences and formats, such as narratives, reports, arguments, etc.

4. Student will be able to equip with basics of communication skills and will apply it for:

- Effective interpersonal communication in various contexts and situations, such as academic, professional, social and personal.
- Developing and delivering oral presentations with clarity, confidence and appropriate language, tone and body language.
- Writing clear, concise and coherent texts for different purposes and audiences, such as essays, reports, letters, emails and summaries.
- Reading and comprehending texts of various genres and levels of difficulty, such as articles, books, journals and manuals.
- Listening and responding to spoken texts of various types and sources,

such as lectures, podcasts, interviews and conversations.

- Using appropriate strategies and tools for communication, such as research, planning, outlining, drafting, revising, editing, proofreading and referencing.
- Demonstrating awareness and respect for the diversity and intercultural aspects of communication, such as norms, values, beliefs and customs of different cultures and groups.
- Reflecting on and evaluating one's own communication strengths and weaknesses, and seeking feedback and improvement opportunities.

Practical and oral purposes by being honed up in presentation skills and voice-dynamics.

- Presentation skills and voice-dynamics are important for practical and oral purposes, such as delivering speeches, lectures, reports, interviews, or negotiations.
- Presentation skills refer to the ability to plan, prepare, and deliver effective and engaging presentations that convey the intended message and achieve the desired outcome.
- Voice-dynamics refer to the ability to use various aspects of voice, such as volume, pitch, tone, pace, and pauses, to enhance the delivery and impact of the presentation.
- Some of the benefits of being honed up in presentation skills and voice-dynamics are:
 - It can increase the confidence and credibility of the speaker.
 - It can improve the clarity and comprehension of the audience.
 - It can capture and maintain the attention and interest of the audience.
 - It can persuade and influence the audience to take action or change their perspective.
 - It can demonstrate the speaker's knowledge and expertise on the topic.
- Some of the ways to improve presentation skills and voice-dynamics are:
 - Analyze the purpose, audience, and context of the presentation.
 - Research and organize the content and structure of the presentation.
 - Use visual aids, such as slides, charts, graphs, or images, to support the presentation.
 - Practice and rehearse the presentation, preferably with feedback from others.
 - Speak with confidence, enthusiasm, and passion.
 - Use appropriate voice-dynamics, such as varying the volume, pitch, tone, pace, and pauses, to emphasize key points, create contrast, and avoid monotony.
 - Use body language, such as eye contact, gestures, facial expressions, and posture, to complement the voice and convey non-verbal messages.

- Engage the audience, such as by asking questions, inviting comments, or using humor, to create rapport and interaction.
- Handle questions and objections, such as by listening, acknowledging, and responding, to address the concerns and doubts of the audience.

5. Students will be able build up personal traits that will make the transition from institution

- The transition from institution to the workplace or further education can be challenging for many students, especially those who lack the necessary personal traits to adapt and succeed in different environments.
- Some of the personal traits that can help students make a smooth and successful transition are:
 - Self-awareness: the ability to recognize one's strengths, weaknesses, interests, values, and goals, and to use this information to guide one's decisions and actions.
 - Self-regulation: the ability to manage one's emotions, impulses, and behaviors, and to cope with stress, challenges, and setbacks in a constructive way.
 - Self-motivation: the ability to set realistic and attainable goals, and to pursue them with persistence, enthusiasm, and optimism.
 - Self-efficacy: the belief in one's capabilities to achieve one's goals, and to overcome obstacles and difficulties.
 - Self-esteem: the sense of respect and confidence in one's worth and abilities, and the acceptance of one's flaws and limitations.
 - Self-reliance: the ability to act independently and responsibly, and to seek help and support when needed.
 - Self-improvement: the willingness to learn from feedback, mistakes, and experiences, and to seek new opportunities and challenges for personal and professional growth.
- Students can build up these personal traits by engaging in various activities and experiences, such as:
 - Participating in extracurricular activities, clubs, or volunteer work that match one's interests and values, and that provide opportunities to develop new skills, meet new people, and contribute to the community.
 - Seeking mentorship, guidance, or coaching from teachers, counselors, peers, or professionals who can offer advice, feedback, and support for one's goals and challenges.
 - Taking online courses, workshops, or seminars that can enhance one's knowledge, skills, or qualifications in a specific field or area of interest.
 - Joining professional associations, networks, or communities that can offer access to information, resources, or opportunities related to one's career or academic aspirations.
 - Seeking internships, apprenticeships, or part-time jobs that can provide practical experience, exposure, and connections in one's desired

industry or sector.

- Reflecting on one’s achievements, challenges, and learnings, and setting new goals and action plans for the future.

How to make the workplace smoother and help employees to excel in their jobs

- A smooth workplace is one where employees can work efficiently, effectively, and harmoniously with each other and with their managers.
- A smooth workplace can enhance employee satisfaction, productivity, creativity, and loyalty, as well as reduce turnover, absenteeism, and conflicts.
- To make the workplace smoother and help employees to excel in their jobs, some possible strategies are:
 - Communicate clearly and respectfully with all stakeholders, such as colleagues, supervisors, clients, and customers. Avoid misunderstandings, misinterpretations, and assumptions by clarifying expectations, providing feedback, and listening actively.
 - Collaborate and cooperate with others to achieve common goals and solve problems. Share information, resources, and ideas, and support each other’s strengths and weaknesses. Recognize and appreciate the contributions and achievements of others.
 - Manage time and tasks effectively and efficiently. Prioritize and organize work according to deadlines, importance, and urgency. Avoid procrastination, distraction, and multitasking. Delegate and outsource when necessary and appropriate.
 - Learn and grow continuously and proactively. Seek feedback and guidance from others, and act on it. Identify and address knowledge and skill gaps, and pursue learning opportunities. Embrace challenges and changes, and adapt to new situations and demands.
 - Maintain a positive and professional attitude and behavior. Demonstrate enthusiasm, initiative, and commitment to the work and the organization. Respect and follow the rules, policies, and norms of the workplace. Avoid gossip, complaints, and negativity.
 - Balance work and personal life. Manage stress and emotions effectively, and cope with difficulties and setbacks. Seek support and assistance when needed, and offer help to others. Take care of physical and mental health, and engage in activities that bring joy and fulfillment.

Content Contact

- Content contact is a term used in web design and development to describe the process of creating and maintaining a connection between the content of a website and its users.
- Content contact can be achieved through various methods, such as:

- Providing clear and concise information that meets the users' needs and expectations.
- Using appropriate language, tone, and style that suits the target audience and the purpose of the website.
- Organizing and structuring the content in a logical and intuitive way that facilitates navigation and comprehension.
- Incorporating visual elements, such as images, videos, animations, or graphics, that enhance the content and support the message.
- Implementing interactive features, such as forms, buttons, links, or menus, that allow the users to perform actions or access additional information.
- Ensuring the content is accessible, responsive, and compatible with different devices, browsers, and platforms.
- Updating and revising the content regularly to keep it relevant, accurate, and fresh.
- Content contact is important for web design and development because it can:
 - Increase the user engagement, satisfaction, and loyalty.
 - Improve the user experience, usability, and functionality of the website.
 - Boost the website's credibility, authority, and reputation.
 - Enhance the website's visibility, ranking, and traffic in search engines.
 - Achieve the website's goals, objectives, and outcomes.

Hours

- An hour is a unit of time that is equal to 60 minutes or 3,600 seconds.
- The symbol for hour is h or hr.
- Hours are commonly used to measure the duration of events, activities, or processes.
- Hours are also used to indicate the time of day in various systems, such as the 12-hour clock or the 24-hour clock.
- The 12-hour clock divides the day into two periods of 12 hours each, called AM (ante meridiem, meaning before noon) and PM (post meridiem, meaning after noon).
- The 24-hour clock uses a single cycle of 24 hours to indicate the time of day, starting from midnight (00:00) and ending at midnight (24:00) of the next day.
- The 24-hour clock is also known as the military time or the international standard time.
- The hour is based on the apparent movement of the sun across the sky, which takes about 24 hours to complete one rotation around the earth.
- However, the length of an hour can vary slightly depending on the season, the latitude, and the time zone.
- The hour is not a fixed unit in the International System of Units (SI), but it is accepted for use with SI units.

Unit-1 Applied Grammar and Usage: 8

- This unit covers the following topics:
 - Subject-verb agreement
 - Pronoun-antecedent agreement
 - Parallelism
 - Modifiers
 - Sentence types and punctuation
- Subject-verb agreement is the rule that the verb must agree in number and person with the subject of a sentence. For example, “He runs fast” is correct, but “He run fast” is incorrect.
- Pronoun-antecedent agreement is the rule that the pronoun must agree in number, gender, and person with the noun or noun phrase that it refers to. For example, “She loves her dog” is correct, but “She loves his dog” is incorrect, unless the dog belongs to someone else.
- Parallelism is the rule that the elements of a sentence that are coordinated or compared must have the same grammatical form and structure. For example, “She likes reading, writing, and painting” is correct, but “She likes reading, to write, and painting” is incorrect.
- Modifiers are words or phrases that modify or describe other words or phrases in a sentence. They should be placed as close as possible to the word or phrase they modify, and they should not cause ambiguity or confusion. For example, “The man with the hat waved to me” is correct, but “Waving to me, the man with the hat left” is incorrect, because it is unclear who is waving.

Transformation of Sentences: Simple, Compound and Complex, Subject-verb agreement, Prefix and Suffix, Antonyms, Synonyms, Homophones

- A sentence is a group of words that expresses a complete thought. There are different types of sentences based on their structure and meaning.
- A simple sentence is a sentence that has only one independent clause. An independent clause is a group of words that has a subject and a verb and can stand alone as a complete sentence. For example, “She sings well.” is a simple sentence.
- A compound sentence is a sentence that has two or more independent clauses joined by a coordinating conjunction (such as and, but, or, nor, for, so, yet) or a semicolon (;). For example, “She sings well and plays the guitar.” is a compound sentence.
- A complex sentence is a sentence that has one independent clause and one or more dependent clauses. A dependent clause is a group of words that has a subject and a verb but cannot stand alone as a complete sentence. It depends on the independent clause for its meaning. A dependent clause can be introduced by a subordinating conjunction (such as because, although, when, if, etc.) or a relative pronoun (such as who, which, that,

etc.). For example, “She sings well because she practices every day.” is a complex sentence.

- Transformation of sentences is the process of changing the form or structure of a sentence without changing its meaning or sense. There are different ways to transform sentences, such as changing the voice (active or passive), changing the mood (indicative, imperative, interrogative, etc.), changing the degree (positive, comparative, superlative), changing the number (singular or plural), etc.
- Subject-verb agreement is the rule that the verb in a sentence must agree with the subject in number (singular or plural) and person (first, second, or third). For example, “He sings well.” is correct, but “He sing well.” is incorrect.
- A prefix is a word part that is added to the beginning of a word to change its meaning. For example, the prefix un- means not, so adding un- to the word happy makes unhappy, which means not happy.
- A suffix is a word part that is added to the end of a word to change its meaning or part of speech. For example, the suffix -ly means in a certain way, so adding -ly to the word happy makes happily, which means in a happy way.
- Antonyms are words that have opposite meanings. For example, hot and cold are antonyms.
- Synonyms are words that have similar or same meanings. For example, happy and glad are synonyms.
- Homophones are words that sound the same but have different meanings and spellings. For example, see and sea are homophones.

Hello, I am Sydney, your AI assistant. I can help you with your topic. Here is some information on homonyms, new word formation, and select word power.

Homonyms

- Homonyms are words that have the same spelling and pronunciation, but different meanings and origins.
- For example, the word “bat” can mean a flying mammal or a wooden club used in sports.
- Homonyms can be classified into two types: homographs and homophones.
- Homographs are words that have the same spelling, but different meanings and pronunciations. For example, the word “lead” can mean a metal or to guide, and it can be pronounced as /led/ or /li d/.
- Homophones are words that have the same pronunciation, but different spellings and meanings. For example, the words “to”, “too”, and “two” are homophones, and they are pronounced as /tu /.

New Word Formation

- New word formation is the process of creating new words from existing words or parts of words.

- There are different methods of new word formation, such as:
 - Affixation: adding prefixes or suffixes to a word. For example, the word “unhappy” is formed by adding the prefix “un-” to the word “happy”.
 - Compounding: combining two or more words to form a new word. For example, the word “bookshelf” is formed by combining the words “book” and “shelf”.
 - Blending: merging parts of two or more words to form a new word. For example, the word “brunch” is formed by blending the words “breakfast” and “lunch”.
 - Clipping: shortening a word by deleting one or more syllables. For example, the word “phone” is formed by clipping the word “telephone”.
 - Acronym: forming a word from the initial letters of a phrase. For example, the word “NASA” is formed from the acronym of “National Aeronautics and Space Administration”.
 - Conversion: changing the word class of a word without changing its form. For example, the word “book” can be used as a noun or a verb.

Select Word Power

- Select word power is the ability to choose the most appropriate and effective words for a given context and purpose.
- Select word power can help you to communicate clearly, precisely, and persuasively, and to avoid ambiguity, confusion, and misunderstanding.
- To improve your select word power, you can:
 - Expand your vocabulary by reading widely, learning new words, and using a dictionary or a thesaurus.
 - Understand the meanings, connotations, and usage of words, and avoid words that are vague, obscure, or inappropriate.
 - Use words that suit your audience, tone, and style, and avoid words that are too formal, informal, or slang.
 - Use words that express your ideas, opinions, and emotions accurately and convincingly, and avoid words that are weak, redundant, or cliché.
 - Use words that create variety, interest, and impact, and avoid words that are repetitive, boring, or dull.

Unit-2: Listening and Speaking Skills

- Listening and speaking skills are essential for effective communication in any language.
- Listening is the process of receiving, understanding, and interpreting spoken messages.
- Speaking is the process of producing and delivering spoken messages.

- Listening and speaking skills are interrelated and interdependent. They influence and support each other in various ways.
- Listening and speaking skills can be improved by practicing various strategies and techniques, such as:
 - Setting a purpose and a goal for listening or speaking
 - Activating prior knowledge and making predictions
 - Paying attention to the speaker's tone, pitch, stress, and intonation
 - Using context clues and non-verbal cues to infer meaning
 - Asking and answering questions to clarify and check understanding
 - Summarizing and paraphrasing the main points and details
 - Giving and receiving feedback
 - Using appropriate vocabulary, grammar, and pronunciation
 - Using discourse markers and cohesive devices to organize and connect ideas
 - Adapting the message to the audience, purpose, and situation
 - Using polite and respectful language and expressions
 - Being confident and assertive, but not aggressive or rude
- Listening and speaking skills can be applied to various contexts and purposes, such as:
 - Academic: listening to lectures, presentations, podcasts, etc.; speaking in class discussions, seminars, oral exams, etc.
 - Professional: listening to meetings, conferences, interviews, etc.; speaking in negotiations, presentations, reports, etc.
 - Social: listening to conversations, stories, jokes, etc.; speaking in casual chats, greetings, invitations, etc.
 - Personal: listening to music, movies, audiobooks, etc.; speaking in self-expression, reflection, narration, etc.

Active Listening: Meaning and Art of Listening, Traits of a Good Listener

- Active listening is a skill that involves paying full attention to the speaker, understanding their message, and responding appropriately.
- Active listening is different from passive listening, which is simply hearing what the speaker says without engaging with them or showing interest.
- Active listening is important for effective communication, building rapport, resolving conflicts, and learning new information.
- Active listening requires the following steps:
 - Prepare to listen: Clear your mind of distractions, avoid interruptions, and focus on the speaker.
 - Show interest: Use nonverbal cues such as eye contact, nodding, smiling, and leaning forward to indicate that you are listening and care about what the speaker is saying.

- Listen attentively: Pay attention to the speaker’s words, tone, body language, and emotions. Try to understand their perspective and avoid making assumptions or judgments.
- Reflect and clarify: Paraphrase or summarize what the speaker said to check your understanding and show that you are listening. Ask open-ended questions to clarify any confusion or ambiguity.
- Respond respectfully: Express your thoughts, feelings, opinions, or feedback in a respectful and constructive way. Acknowledge the speaker’s point of view and avoid interrupting, criticizing, or arguing with them.
- Traits of a good listener include:
 - Empathy: The ability to put yourself in the speaker’s shoes and understand their feelings and emotions.
 - Patience: The ability to listen without rushing, interrupting, or jumping to conclusions.
 - Open-mindedness: The ability to listen without bias, prejudice, or preconceived notions.
 - Curiosity: The ability to ask relevant and insightful questions to learn more about the speaker and their message.
 - Respect: The ability to listen without judging, mocking, or dismissing the speaker or their message.

Listening modes, listening and Note taking, Types of Listening, Listening

- Listening modes are the different ways of processing and understanding spoken information, depending on the purpose and context of listening.
- There are four main listening modes: attentive, responsive, selective, and active.
- Attentive listening is when the listener pays close attention to the speaker and tries to comprehend and remember the message without interrupting or judging.
- Responsive listening is when the listener provides feedback to the speaker, such as nodding, asking questions, or expressing agreement or disagreement.
- Selective listening is when the listener focuses on specific parts of the message that are relevant or interesting to them, and ignores or filters out the rest.
- Active listening is when the listener engages with the speaker and the message, by paraphrasing, summarizing, clarifying, or reflecting on what they hear.
- Listening and note taking are skills that help the listener to capture and retain the main points of a spoken message, especially in academic or

professional settings.

- Some strategies for effective listening and note taking are:
 - Prepare before listening, by reviewing the topic, setting a goal, and predicting what the speaker might say.
 - Listen for the main ideas and supporting details, and use cues such as the speaker's tone, gestures, and transitions to identify them.
 - Take notes in an organized and concise way, using symbols, abbreviations, and outlines to save time and space.
 - Review and revise the notes after listening, by filling in the gaps, checking for accuracy, and highlighting the key points.
- Types of listening are the different purposes and contexts of listening, which require different skills and strategies from the listener.
- There are many types of listening, but some common ones are:
 - Informative listening, which is listening to learn or acquire new information or knowledge, such as in lectures, podcasts, or documentaries.
 - Critical listening, which is listening to evaluate or analyze the speaker's arguments, evidence, or credibility, such as in debates, speeches, or reviews.
 - Empathic listening, which is listening to understand or share the speaker's feelings, emotions, or experiences, such as in counseling, therapy, or friendship.
 - Appreciative listening, which is listening to enjoy or appreciate the speaker's style, creativity, or performance, such as in music, poetry, or storytelling.
- Listening is the process of receiving, attending, understanding, and responding to spoken messages.
- Listening is a complex and active skill that involves both physical and mental processes.
- Some benefits of listening are:
 - It improves communication and interpersonal skills, by enhancing the quality of interactions and relationships.
 - It enhances learning and academic performance, by increasing the retention and comprehension of information.
 - It develops critical thinking and problem-solving skills, by enabling the listener to evaluate and synthesize different perspectives and ideas.
 - It fosters empathy and compassion, by allowing the listener to connect and empathize with others' feelings and experiences.

Techniques using Ted Talk Audio listening with script reading, Pronunciation

- Ted Talks are short, engaging, and informative presentations on various topics, delivered by experts or enthusiasts in their fields. They are available online, with audio and video recordings, as well as transcripts and subtitles in different languages.
- Listening to Ted Talks can help improve one's listening skills, vocabulary, comprehension, and general knowledge. Reading the transcripts or subtitles along with the audio can also help with spelling, grammar, and pronunciation.
- Some techniques to use Ted Talks for listening and pronunciation practice are:
 - Choose a topic that interests you, or that is related to your field of study or work. This will make the listening more enjoyable and relevant.
 - Before listening, preview the transcript or subtitles and look up any unfamiliar words or phrases. You can also read the summary or description of the talk to get an idea of the main points and purpose.
 - Listen to the talk once without reading the transcript or subtitles, and try to understand the main idea and the speaker's tone and attitude. You can also take notes of any keywords or details that you hear.
 - Listen to the talk again, this time with the transcript or subtitles, and check your understanding and notes. Pay attention to how the speaker pronounces the words, especially the stress, intonation, and rhythm. You can also highlight or underline any words or phrases that you want to remember or practice later.
 - Listen to the talk a third time, and try to repeat or shadow the speaker's words and sentences. You can pause the audio after each sentence or phrase, and repeat it aloud or in your head. Try to imitate the speaker's pronunciation, accent, and expression as closely as possible.
 - Review the talk and your notes, and summarize the main points and message of the talk in your own words. You can also write down any questions or comments that you have about the talk, or discuss it with a partner or a group.
 - Practice the words or phrases that you highlighted or underlined, and use them in your own sentences or contexts. You can also record yourself saying them and compare your pronunciation with the speaker's. You can also use online tools or apps to check your pronunciation, such as Youglish, Forvo, or Google Translate.

Speaking style ; content and sequencing

- Speaking style refers to how a speaker communicates their message, such as their tone, pace, volume, clarity, and language choice.
- Content refers to what a speaker says, such as their main points, supporting evidence, examples, and conclusions.
- Sequencing refers to how a speaker organizes their content, such as their introduction, body, and conclusion, and the transitions between them.
- A good speaking style should be appropriate for the purpose, audience, and context of the speech, and should convey the speaker's credibility, confidence, and personality.
- A good content should be relevant, accurate, clear, concise, and interesting for the audience, and should support the speaker's main goal and thesis statement.
- A good sequencing should follow a logical and coherent structure, such as chronological, topical, spatial, problem-solution, cause-effect, or compare-contrast, and should use signposts, summaries, and previews to guide the audience through the speech.

Unit-3: Reading and Writing Skills: 8

- This unit focuses on developing the skills of reading and writing in academic contexts.
- Reading skills include:
 - Identifying the main idea and supporting details of a text.
 - Recognizing the structure and organization of a text.
 - Skimming and scanning for specific information.
 - Inferring the meaning of unfamiliar words and phrases from the context.
 - Evaluating the credibility and relevance of a source.
 - Summarizing and paraphrasing the main points of a text.
- Writing skills include:
 - Planning and outlining the content and structure of a writing task.
 - Writing clear and coherent sentences and paragraphs.
 - Using appropriate vocabulary, grammar, punctuation and spelling.
 - Applying the conventions of academic writing, such as citation and referencing.
 - Editing and revising the draft for clarity, accuracy and coherence.
 - Using feedback to improve the quality of the final product.
- The unit provides various activities and exercises to practice and improve these skills, such as:
 - Reading and analyzing different types of texts, such as essays, reports, articles, reviews, etc.
 - Writing different types of texts, such as summaries, critiques, proposals, etc.
 - Completing tasks that require integrating reading and writing skills,

such as synthesizing information from multiple sources, comparing and contrasting different perspectives, etc.

Reading style: Skimming; Scanning; Churning & Assimilation, Effective writing

- Reading is a skill that involves understanding and processing written information.
- Different reading styles can be used for different purposes and contexts.
- Some of the common reading styles are:
 - Skimming: This is a fast reading technique that involves looking for the main idea or gist of a text. Skimming can be useful for getting an overview of a text, finding out the topic, or identifying the main arguments or conclusions. Skimming can be done by reading the title, headings, subheadings, introduction, conclusion, and first sentences of paragraphs.
 - Scanning: This is another fast reading technique that involves looking for specific information or details in a text. Scanning can be useful for finding answers to questions, locating facts or figures, or identifying keywords or terms. Scanning can be done by using the table of contents, index, glossary, or visual aids, or by moving the eyes quickly over the text to find the relevant information.
 - Churning: This is a slow and careful reading technique that involves analyzing and evaluating a text. Churning can be useful for understanding the meaning, structure, and logic of a text, or for forming an opinion or judgment about it. Churning can be done by reading the text word by word, sentence by sentence, or paragraph by paragraph, and by taking notes, summarizing, or paraphrasing the main points.
 - Assimilation: This is a deep and active reading technique that involves integrating and applying the information from a text to one's own knowledge and experience. Assimilation can be useful for learning new concepts, skills, or perspectives, or for solving problems or making decisions. Assimilation can be done by relating the text to one's own background, interests, and goals, and by using strategies such as questioning, reflecting, comparing, contrasting, or synthesizing the information.
- Effective writing is a skill that involves communicating one's ideas clearly, concisely, and coherently to the intended audience and purpose.
- Some of the elements of effective writing are:
 - Content: This refers to the information, ideas, and arguments that are presented in the writing. Content should be relevant, accurate,

and well-organized to support the main message or thesis of the writing.

- Structure: This refers to the arrangement and sequence of the parts of the writing, such as the introduction, body, and conclusion. Structure should follow a logical and coherent order that guides the reader through the writing and connects the main points and subpoints.
- Language: This refers to the choice and use of words, sentences, and paragraphs in the writing. Language should be appropriate, clear, and precise to convey the meaning and tone of the writing. Language should also follow the rules and conventions of grammar, spelling, punctuation, and formatting.

Tools and Methods: Inductive Deductive; Exposition; Linear; Interrupted; Spatial

- Inductive and deductive are two methods of reasoning that are based on different premises and lead to different conclusions.
- Inductive reasoning moves from specific observations to broad generalizations, while deductive reasoning moves from general rules to specific cases.
- Inductive reasoning aims at developing a theory, while deductive reasoning aims at testing an existing theory.
- Inductive reasoning is more open-ended and exploratory, while deductive reasoning is more structured and logical.
- Exposition is a method of writing that explains, informs, or describes a topic or idea.
- Exposition can be organized in different ways, such as by definition, classification, comparison and contrast, cause and effect, or problem and solution.
- Exposition can also use different modes of expression, such as narration, description, illustration, or argumentation.
- Linear, interrupted, spatial, and chronological are some of the methods of paragraph writing that depend on the order of the topic sentence and the supporting sentences.
- Linear method is when the topic sentence is placed at the beginning of the paragraph, followed by the supporting sentences in a logical sequence.
- Interrupted method is when the topic sentence is placed in the middle or at the end of the paragraph, creating a suspense or a surprise for the reader.
- Spatial method is when the supporting sentences describe the topic sentence in terms of its physical location, shape, size, or direction.
- Chronological method is when the supporting sentences describe the topic sentence in terms of its time sequence, order of events, or history.

Chronological etc, Official and Business Letter writing, Agenda, Notices

- Chronological etc is a type of resume format that lists the work experience and education of a person in reverse chronological order, starting from the most recent to the oldest. This format is suitable for people who have a consistent and stable work history, and who want to highlight their skills and achievements.
- Official and business letter writing is a form of communication that follows a formal and professional tone, structure, and layout. Official and business letters are used for various purposes, such as making inquiries, requests, complaints, invitations, proposals, orders, confirmations, etc. Official and business letters typically include the following elements: sender's address, date, inside address, salutation, subject line, body, complimentary close, signature, and enclosures (if any).
- Agenda is a list of items or topics that are to be discussed or accomplished in a meeting or event. An agenda helps to organize and plan the meeting or event, and to inform the participants of the objectives, expectations, and responsibilities. An agenda usually includes the following elements: title, date, time, location, attendees, objectives, topics, time allocation, and action items.
- Notices are brief and formal announcements that inform the public or a specific group of people about something important or relevant, such as an event, a change, a policy, a deadline, etc. Notices are usually written in a clear, concise, and direct manner, and include the following elements: heading, date, body, signature, and designation. Notices are often displayed on notice boards, websites, newspapers, or other media.

Minutes of meeting

- Minutes of meeting are a written record of the main points and decisions made during a meeting.
- They are usually prepared by a designated person, such as a secretary or a chairperson, and distributed to the participants and other stakeholders after the meeting.
- The purpose of minutes of meeting is to provide an accurate and concise summary of what was discussed and agreed upon, as well as to assign responsibilities and deadlines for the follow-up actions.
- The format and content of minutes of meeting may vary depending on the type and purpose of the meeting, but they typically include the following elements:
 - The date, time, and location of the meeting
 - The names and roles of the attendees and the absentees
 - The agenda items and the order of discussion

- The main points, arguments, and opinions raised by the participants
 - The decisions made and the votes taken, if any
 - The action items and the responsible persons and deadlines for each item
 - The date and time of the next meeting, if applicable
 - Any other relevant information, such as attachments, documents, or links
- Minutes of meeting should be clear, concise, and objective, and avoid unnecessary details, personal comments, or opinions.
 - Minutes of meeting should be reviewed and approved by the chairperson or the participants before being finalized and distributed.
 - Minutes of meeting should be stored and archived in a secure and accessible location for future reference and accountability.

Unit-4: Presentation and Interaction Skills

- Presentation and interaction skills are the abilities to communicate effectively and confidently with an audience, using appropriate verbal and non-verbal cues, visual aids, and technology.
- Presentation and interaction skills are important for various purposes, such as academic, professional, personal, and social contexts.
- Presentation and interaction skills can be improved by following some general guidelines, such as:
 - Analyzing the purpose, audience, and context of the presentation.
 - Planning and organizing the content, structure, and delivery of the presentation.
 - Practicing and rehearsing the presentation, using feedback and self-evaluation.
 - Using clear and concise language, appropriate tone and voice, and engaging body language and eye contact.
 - Using visual aids, such as slides, charts, graphs, images, videos, etc., to support and enhance the message.
 - Using technology, such as microphones, speakers, projectors, etc., to facilitate the presentation and interaction.
 - Handling questions and comments from the audience, using active listening, paraphrasing, and responding skills.
 - Evaluating the effectiveness and impact of the presentation and interaction, using criteria and feedback.

Introduction to oral communication, Nuances and Modes of Speech Delivery

Oral communication is the process of expressing ideas, feelings, opinions, or information through spoken words. Oral communication can take place in various contexts, such as interpersonal, group, public, or mass communication. Oral communication has several advantages and disadvantages compared to written communication. Some of the advantages are:

- It allows for immediate feedback and clarification.
- It can convey emotions and non-verbal cues more effectively.
- It can create rapport and trust between the speaker and the listener.
- It can be more persuasive and engaging than written communication.

Some of the disadvantages are:

- It can be affected by noise, distractions, or interruptions.
- It can be misunderstood or misinterpreted due to lack of visual aids or written records.
- It can be influenced by the speaker's or the listener's biases, prejudices, or emotions.
- It can be less organized and structured than written communication.

Nuances and modes of speech delivery are two important aspects of oral communication that can affect its quality and effectiveness. Nuances are the subtle variations in tone, pitch, volume, speed, or emphasis that can convey different meanings or emotions in speech. Modes of speech delivery are the different ways of presenting a speech, such as impromptu, extemporaneous, manuscript, or memorized. Each mode has its own advantages and disadvantages, depending on the purpose, audience, and occasion of the speech. Some of the advantages and disadvantages are:

- Impromptu speech is a speech that is delivered without any preparation or notes. It can be spontaneous, natural, and flexible, but it can also be disorganized, unclear, or unconvincing.
- Extemporaneous speech is a speech that is prepared and rehearsed in advance, but delivered with few or no notes. It can be organized, coherent, and persuasive, but it can also be affected by nervousness, forgetfulness, or lack of eye contact.
- Manuscript speech is a speech that is written out word for word and read from a paper or a teleprompter. It can be accurate, precise, and consistent, but it can also be monotonous, boring, or impersonal.
- Memorized speech is a speech that is written out word for word and recited from memory. It can be fluent, confident, and impressive, but it can also be rigid, unnatural, or robotic.

Public speaking: confidence, clarity, and fluency, Individual Speaking: Elements

Public speaking is the act of communicating a message to an audience, usually in a formal or professional setting. Public speaking requires confidence, clarity, and fluency to deliver an effective and engaging speech.

Some of the elements of individual speaking are:

- **Purpose:** The speaker should have a clear and specific goal for their speech, such as informing, persuading, entertaining, or inspiring the audience. The purpose should guide the content, structure, and delivery of the speech.
- **Audience:** The speaker should know who their audience is, what their needs, interests, and expectations are, and how to adapt their speech accordingly. The speaker should also consider the size, setting, and mood of the audience, and use appropriate language, tone, and style.
- **Content:** The speaker should have a well-organized and coherent speech, with a clear introduction, body, and conclusion. The speaker should use relevant and credible evidence, examples, and stories to support their main points and arguments. The speaker should also use transitions, signposts, and summaries to help the audience follow the speech.
- **Structure:** The speaker should use a logical and effective structure for their speech, such as chronological, topical, problem-solution, cause-effect, or compare-contrast. The speaker should also use an outline to plan and organize their speech, and follow a clear and consistent pattern of organization.
- **Delivery:** The speaker should use vocal and nonverbal techniques to enhance their speech, such as volume, pitch, rate, pauses, eye contact, gestures, facial expressions, and posture. The speaker should also use visual aids, such as slides, charts, graphs, or images, to supplement their speech and make it more interesting and memorable. The speaker should also practice their speech and rehearse their delivery before the actual presentation.

Non verbal Communication: Kinesics, Paralinguistic features of Voice-Dynamics

Non verbal communication is the process of sending and receiving messages without using words, either spoken or written. It can include gestures, facial expressions, eye contact, posture, tone of voice, and other aspects of body language and vocalization. Non verbal communication can convey emotions, attitudes, intentions, and preferences, as well as complement, reinforce, or contradict verbal messages.

Kinesics is the study of body movements and facial expressions as a form of non verbal communication. It can include the following types of gestures:

- Emblems: gestures that have a direct verbal translation, such as nodding for yes or shaking the head for no.
- Illustrators: gestures that accompany speech and illustrate or emphasize what is being said, such as pointing or waving.
- Regulators: gestures that regulate the flow of conversation, such as raising the hand to signal a turn to speak or looking away to indicate disinterest.
- Adaptors: gestures that are used to manage emotions or cope with stress, such as biting the nails or tapping the foot.
- Affect displays: gestures that express feelings or emotions, such as smiling, frowning, or crying.

Head movements and posture are also part of kinesics and can convey information about the speaker's attitude, confidence, interest, and dominance. For example, tilting the head can indicate curiosity, leaning forward can show engagement, and crossing the arms can signal defensiveness.

Eye contact is another important aspect of kinesics, as it can communicate attention, interest, attraction, respect, or hostility. Eye contact can also regulate the turn-taking in a conversation, as well as convey feedback, such as nodding, blinking, or widening the eyes.

Facial expressions are the most expressive and universal form of kinesics, as they can convey a range of emotions, such as happiness, sadness, anger, fear, surprise, or disgust. Facial expressions are often involuntary and hard to control, and can therefore reveal the true feelings of the speaker.

Paralinguistic features of voice-dynamics are the vocal aspects of non verbal communication that are separate from the actual words or language. They include the following elements:

- Voice quality: the distinctive characteristics of a person's voice, such as pitch, timbre, resonance, and breathiness.
- Rate: the speed at which a person speaks, which can indicate excitement, nervousness, boredom, or confidence.
- Pitch: the highness or lowness of a person's voice, which can indicate emotions, such as happiness, sadness, anger, or surprise.
- Volume: the loudness or softness of a person's voice, which can indicate intensity, enthusiasm, aggression, or submissiveness.
- Speaking style: the way a person speaks, such as using formal or informal language, slang, jargon, or dialect.
- Prosodic features: the variations in the tone, stress, and intonation of a person's voice, which can convey meaning, emphasis, or attitude.

Paralinguistic features of voice-dynamics can complement, modify, or contradict the verbal message, as well as express the speaker's personality, mood, or relationship with the listener. For example, a sarcastic remark can be indicated by a rising intonation, a question can be emphasized by a higher pitch, and a command can be delivered by a louder volume.

Proxemics, Chronemics, and Presentation Strategies: planning, preparation

- Proxemics is the study of how people use and perceive the physical space around them. It involves issues such as personal space, territoriality, and nonverbal communication.
- Chronemics is the study of how people use and perceive time. It involves issues such as punctuality, time management, and cultural differences in time orientation.
- Presentation strategies are the methods and techniques that speakers use to plan, prepare, and deliver effective presentations. They involve issues such as audience analysis, purpose and goal setting, content selection and organization, visual aids, delivery skills, and feedback.
- Some of the steps involved in planning and preparing a presentation are:
 - Analyze the audience: identify their needs, expectations, interests, and background knowledge.
 - Define the purpose and goal: determine the main objective and desired outcome of the presentation.
 - Select and organize the content: choose the most relevant and appropriate information and arrange it in a logical and coherent structure.
 - Design and prepare the visual aids: select the most suitable and effective media and tools to support and enhance the presentation.
 - Practice the delivery: rehearse the presentation several times, paying attention to the verbal and nonverbal aspects of communication, such as voice, eye contact, gestures, and posture.
 - Evaluate the feedback: collect and analyze the responses and reactions of the audience, and use them to improve the presentation.

Organization, Delivery

- Organization and delivery are two essential aspects of effective communication, especially in oral presentations.
- Organization refers to the structure and order of the main points and supporting details in a speech or a written document. It helps the audience to follow the logic and flow of the message, and to remember the key points.
- Delivery refers to the way the speaker or the writer presents the message, using vocal and nonverbal cues, language, style, and tone. It helps the audience to engage with the message, and to perceive the speaker or the writer as credible, confident, and competent.
- Some general principles of organization and delivery are:
 - Know your purpose and audience. Before preparing your message, you should have a clear idea of what you want to achieve and who

you are addressing. This will help you to tailor your message to suit the needs and expectations of your audience.

- Plan and outline your message. You should have a clear introduction, body, and conclusion for your message, and use transitions to connect them. You should also arrange your main points and supporting details in a logical and coherent way, using a suitable pattern of organization, such as chronological, spatial, topical, problem-solution, cause-effect, etc.
- Practice and rehearse your message. You should practice your message several times, preferably in front of a mirror, a recorder, or a friend. You should also rehearse your message in the same setting and with the same equipment that you will use for the actual presentation. This will help you to improve your delivery skills, such as eye contact, gestures, posture, voice, pace, volume, pronunciation, etc.
- Adapt and revise your message. You should be prepared to adjust your message according to the feedback and reactions of your audience, the time limit, the technical issues, or the unexpected situations that may arise during the presentation. You should also revise your message after the presentation, based on the evaluation and comments that you receive from your audience, your peers, or your instructor. This will help you to improve your communication skills for future occasions.

Unit-5: Workplace skills: 8

- Workplace skills are the abilities and competencies that enable employees to perform their tasks effectively and efficiently in different work environments.
- Workplace skills can be classified into three categories: technical skills, interpersonal skills, and personal skills.
- Technical skills are the specific knowledge and abilities required to perform a certain job or task, such as operating a machine, using a software, or applying a mathematical formula.
- Interpersonal skills are the skills that enable employees to communicate, collaborate, and interact with others in a positive and respectful manner, such as listening, speaking, writing, negotiating, and resolving conflicts.
- Personal skills are the skills that reflect the individual's personality, attitude, and work ethic, such as self-motivation, time management, problem-solving, creativity, and adaptability.
- Workplace skills are important for employees to achieve their goals, meet the expectations of their employers and customers, and adapt to the changing demands and challenges of the work environment.
- Workplace skills can be developed and improved through various methods, such as formal education, training, mentoring, coaching, feedback, self-assessment, and practice.

Leadership qualities; Impact, Communication skills for Leaders: Listening and

- Leadership is the ability to influence, motivate, and inspire others to achieve a common goal or vision.
- Leadership qualities are the characteristics, skills, and behaviors that make a leader effective and respected.
- Some of the most important leadership qualities are:
 - Impact: The ability to create positive change and make a difference in the lives of others, the organization, and the world.
 - Communication skills: The ability to express oneself clearly, confidently, and persuasively, both verbally and non-verbally, and to listen actively and empathetically to others.
 - Listening and: The ability to pay attention to what others are saying, understand their perspectives and emotions, and respond appropriately and constructively.
 - Vision: The ability to see the big picture, imagine the future, and communicate a compelling direction and purpose for others to follow.
 - Integrity: The ability to act in accordance with one's values, principles, and ethical standards, and to be honest, trustworthy, and accountable.
 - Courage: The ability to face challenges, risks, and uncertainties, and to act decisively and confidently in the face of opposition or criticism.
 - Creativity: The ability to generate new and innovative ideas, solutions, and approaches, and to foster a culture of learning and experimentation.
 - Collaboration: The ability to work effectively with others, leverage diversity, and build strong and positive relationships.
 - Self-awareness: The ability to recognize one's strengths, weaknesses, emotions, and biases, and to seek feedback and learn from experience.
 - Adaptability: The ability to adjust to changing situations, demands, and expectations, and to embrace change and uncertainty as opportunities for growth and improvement.

Responding; Mental health at work place: Managing Stress; Techniques:

- Stress is a natural and inevitable part of life, especially in the workplace. It can affect our physical, mental and emotional well-being, as well as our productivity and performance.
- However, not all stress is bad. Some stress can motivate us to achieve our goals, challenge ourselves and grow. The key is to find a balance between positive and negative stress, and to manage it effectively.
- There are many techniques that can help us cope with stress and reduce

its negative impact on our health and happiness. Some of these techniques are:

- **Identify the sources of stress.** The first step to managing stress is to recognize what causes it. We can do this by keeping a stress diary, where we write down the situations, events, people or thoughts that trigger our stress response. We can also rate the intensity of our stress on a scale of 1 to 10, and note how we react to it physically, mentally and emotionally. This can help us gain insight into our stress patterns and identify the areas that need improvement.
- **Change the way we think.** Sometimes, the way we perceive and interpret a situation can make it more stressful than it actually is. We can learn to challenge our negative or irrational thoughts and replace them with more realistic and positive ones. For example, instead of thinking “I can’t do this, it’s too hard”, we can think “This is a challenge, but I can handle it with some effort and support”. This can help us reduce our anxiety and increase our confidence.
- **Practice relaxation techniques.** Relaxation techniques can help us calm our mind and body, and lower our stress levels. Some of the common relaxation techniques are deep breathing, progressive muscle relaxation, meditation, yoga, tai chi, massage, aromatherapy, music, art, etc. We can choose the ones that suit our preferences and lifestyle, and practice them regularly, especially when we feel stressed or overwhelmed.
- **Exercise regularly.** Physical activity can help us release the tension and negative emotions that build up due to stress. It can also improve our mood, energy, sleep quality, immune system and overall health. We can aim for at least 30 minutes of moderate exercise, such as walking, jogging, cycling, swimming, etc., at least five times a week. We can also incorporate some physical activity into our daily routine, such as taking the stairs, stretching, gardening, etc.
- **Eat well and stay hydrated.** What we eat and drink can affect our stress levels and our ability to cope with it. We can try to eat a balanced diet that includes plenty of fruits, vegetables, whole grains, lean protein, healthy fats, and low-fat dairy products. We can also limit our intake of caffeine, alcohol, sugar, salt and processed foods, as they can worsen our stress response and harm our health. We can also drink enough water to stay hydrated and prevent dehydration, which can cause fatigue, headaches, irritability and poor concentration.
- **Get enough sleep and rest.** Sleep is essential for our physical and mental health, as it helps us repair and restore our body and mind. Lack of sleep can impair our cognitive functions, mood, memory, judgment, decision-making and performance. It can also increase our stress levels and make us more vulnerable to illness. We can try to get at least seven to nine hours of quality sleep every night, and follow a regular sleep schedule. We can also avoid using electronic devices,

caffeine, alcohol and nicotine before bedtime, as they can interfere with our sleep quality. We can also take short breaks during the day to relax and recharge our energy.

- **Seek social support.** Social support can help us cope with stress and improve our well-being. It can provide us with emotional, practical and informational assistance, as well as a sense of belonging, acceptance and validation. We can seek social support from our family, friends, colleagues, mentors, counselors, support groups, online communities, etc. We can also offer our support to others who are going through stress, as it can make us feel good and strengthen our relationships.
- **Manage our time and tasks.** Poor time and task management can cause us to feel overwhelmed, frustrated and stressed. We can learn to prioritize our tasks, set realistic and achievable goals, delegate or outsource some of the work, avoid procrastination, plan ahead, use a calendar or a to-do list, etc. We can also learn to say no to the requests or demands that are not important or urgent, and that can add to our stress. We can also balance our work and personal life, and make time for the activities and hobbies that we enjoy and that make us happy.

Application of 4 A's; Avoid; Alter; Access; Adapt

The 4 A's are a framework for managing stress in different situations. They are:

- **Avoid:** This means avoiding unnecessary stressors that are not important or relevant to your goals. For example, you can avoid stress by:
 - Saying no to additional responsibilities that you cannot handle.
 - Limiting your exposure to negative people or media.
 - Decluttering your environment and schedule.
- **Alter:** This means changing the way you communicate or behave in stressful situations. For example, you can alter stress by:
 - Expressing your feelings and needs assertively and respectfully.
 - Compromising and negotiating with others to find a win-win solution.
 - Managing your time and priorities effectively.
- **Access:** This means seeking support and resources from others who can help you cope with stress. For example, you can access support by:
 - Talking to a trusted friend, family member, or counselor.
 - Joining a support group or community that shares your challenges or interests.
 - Seeking professional advice or assistance when needed.
- **Adapt:** This means adjusting your attitude and expectations to the reality of the situation. For example, you can adapt to stress by:

- Reframing the problem and finding the positive aspects or opportunities.
- Accepting the things that you cannot change and focusing on what you can control.
- Practicing gratitude, optimism, and humor.

Course Outcomes:

- By the end of this course, you will be able to:
 - Identify and explain the key concepts and principles of artificial intelligence, such as search, knowledge representation, reasoning, planning, learning, and natural language processing.
 - Apply various artificial intelligence techniques and algorithms to solve problems and tasks, such as heuristic search, constraint satisfaction, logic programming, probabilistic inference, decision making, neural networks, and machine translation.
 - Evaluate the strengths and limitations of different artificial intelligence approaches and methods, and compare their performance and applicability to different domains and scenarios.
 - Design and implement artificial intelligence systems and applications using appropriate tools and frameworks, such as Python, TensorFlow, PyTorch, and NLTK.
 - Demonstrate ethical awareness and social responsibility when developing and using artificial intelligence systems and applications, and consider their potential impacts and implications on individuals, society, and the environment.

1. Write professionally in simple and correct English.

- Writing professionally means using clear, concise and respectful language that is appropriate for the intended audience and purpose.
- Writing in simple and correct English means avoiding unnecessary jargon, slang, abbreviations, errors and ambiguity that may confuse or offend the reader.
- Some tips for writing professionally in simple and correct English are:
 - Know your audience and tailor your tone, style and vocabulary accordingly.
 - Use active voice, short sentences and paragraphs, and simple words whenever possible.
 - Use proper grammar, spelling, punctuation and capitalization.
 - Use headings, bullet points, lists and tables to organize and present your information effectively.
 - Avoid repetition, redundancy, filler words and vague expressions.
 - Use transitions, connectors and signposts to guide the reader through your text and show the logical relationships between your ideas.

- Use examples, evidence, facts and figures to support your claims and arguments.
- Cite your sources and give credit where it is due.
- Proofread and edit your text before sending or publishing it.
- Use online tools and resources, such as dictionaries, thesauruses, grammar checkers and style guides, to help you improve your writing skills.

2. Demonstrate active listening with comprehension, and the ability to write clear and well-structured emails and proposals.

- Active listening is the process of paying attention to what the speaker is saying, and showing interest and engagement through verbal and non-verbal cues.
- Comprehension is the ability to understand the meaning and intention of the speaker, and to respond appropriately and effectively.
- Writing clear and well-structured emails and proposals is the skill of communicating your ideas, requests, or suggestions in a concise, logical, and polite manner, using appropriate tone, format, and language.

Some points to demonstrate active listening with comprehension, and the ability to write clear and well-structured emails and proposals are:

- Before listening or writing, identify the purpose and goal of the communication, and the expectations and needs of the audience.
- During listening, use techniques such as paraphrasing, summarizing, asking open-ended questions, and giving feedback to show that you are following and understanding the speaker.
- After listening, confirm your understanding and agreement, or clarify any doubts or disagreements, and express your appreciation and gratitude for the speaker's time and input.
- Before writing, plan and organize your content, and decide on the main message, the supporting points, and the call to action.
- During writing, use clear and simple language, avoid jargon and slang, and use correct grammar, spelling, and punctuation.
- After writing, proofread and edit your email or proposal, and check for clarity, coherence, and completeness.
- Use appropriate salutations, greetings, and closings, and maintain a respectful and professional tone throughout your email or proposal.
- Use a suitable format and layout for your email or proposal, and include relevant details such as subject line, date, recipient, sender, introduction, body, conclusion, and signature.
- Attach any necessary documents or files, and cite any sources or references that you use in your email or proposal.

3. Learn the use of correct body language and tone of voice to enhance communication.

- Body language and tone of voice are important aspects of communication that convey non-verbal messages and emotions.
- Body language refers to the gestures, postures, facial expressions, eye contact, and physical distance that people use to communicate with others.
- Tone of voice refers to the pitch, volume, speed, and quality of the sound that people use to express their thoughts and feelings.
- Correct body language and tone of voice can enhance communication by:
 - Showing interest, attention, and respect for the speaker and the topic.
 - Providing feedback, confirmation, and clarification to the speaker and the listener.
 - Emphasizing, reinforcing, and complementing the verbal message.
 - Expressing emotions, attitudes, and intentions that may not be conveyed by words alone.
 - Building rapport, trust, and empathy with the communication partner.
- Some examples of correct body language and tone of voice are:
 - Nodding, smiling, and leaning forward to show interest and agreement.
 - Maintaining eye contact and avoiding distractions to show attention and respect.
 - Using gestures and facial expressions to emphasize and illustrate the verbal message.
 - Modulating the pitch, volume, and speed of the voice to match the mood and context of the communication.
 - Using a clear, confident, and polite tone of voice to convey credibility and professionalism.
- Some examples of incorrect body language and tone of voice are:
 - Crossing arms, frowning, and looking away to show boredom and disagreement.
 - Checking the phone, interrupting, and yawning to show lack of attention and respect.
 - Using inappropriate or exaggerated gestures and facial expressions to confuse or offend the communication partner.
 - Speaking in a monotone, too loud, or too fast to lose the interest and attention of the listener.
 - Using a vague, hesitant, or rude tone of voice to convey uncertainty and disrespect.

4. Acquire the skills necessary to communicate effectively and deliver presentations with clarity

- Communication is the process of exchanging information, ideas, opinions, and emotions with others. Effective communication is essential for any

professional or personal endeavor, as it can help to build trust, rapport, and understanding, as well as to persuade, influence, and motivate others.

- Presentations are a common form of communication in various settings, such as academic, business, or social. Presentations are usually delivered to an audience, either in person or online, with the purpose of informing, educating, entertaining, or persuading them about a certain topic or issue.
- To communicate effectively and deliver presentations with clarity, one needs to acquire the following skills:
 - **Planning and preparation:** This involves defining the purpose, audience, and objectives of the communication or presentation, as well as researching and organizing the content, choosing the appropriate format and medium, and rehearsing the delivery.
 - **Verbal and non-verbal communication:** This involves using clear, concise, and appropriate language, tone, and voice, as well as gestures, facial expressions, eye contact, and body language, to convey the message and engage the audience.
 - **Visual aids and technology:** This involves using relevant and attractive images, graphs, charts, diagrams, videos, or other visual elements, as well as software, hardware, or online platforms, to support and enhance the communication or presentation.
 - **Listening and feedback:** This involves paying attention to the audience's reactions, questions, comments, and feedback, as well as responding to them effectively and respectfully, and incorporating them into the communication or presentation.
 - **Evaluation and improvement:** This involves assessing the strengths and weaknesses of the communication or presentation, as well as the outcomes and impacts, and identifying the areas for improvement and learning.

and impact

- is a symbol that is used to indicate a heading or a subheading in markdown format. It is also known as a hash sign or a pound sign.
- Impact is the effect or influence of one thing on another. It can also mean a forceful contact or collision of two things.
-

and impact can be related in different ways, depending on the context and the purpose of the message.

- Some possible ways to relate ### and impact are:
 - Using ### to emphasize the impact of a certain topic or idea on the audience. For example, ### The Impact of Climate Change on the World.
 - Using ### to organize the information about the impact of a certain topic or idea into different levels or categories. For example, ### Impact of Social Media on Society
- *

Positive Impact

*

Negative Impact

*

Future Implications

- Using ### to create a contrast or a comparison between the impact of different topics or ideas. For example, ### Impact of COVID-19 vs. Impact of SARS.
- Using ### to indicate the source or the cause of the impact of a certain topic or idea. For example, ### How Technology Impacts Education.
- Using ### to indicate the scope or the scale of the impact of a certain topic or idea. For example, ### Global Impact of Terrorism.

5. Understand and apply some important aspects of core skills, like Leadership and stress

- Leadership is the ability to influence, motivate, and inspire others to achieve a common goal or vision.
- Some of the key skills of effective leaders are: communication, emotional intelligence, decision making, problem solving, delegation, and feedback.
- Communication is the process of exchanging information, ideas, and emotions with others, using verbal and non-verbal cues.
- Emotional intelligence is the ability to recognize, understand, and manage one's own and others' emotions, and to use them appropriately in different situations.
- Decision making is the ability to choose the best course of action among various alternatives, considering the available information, risks, and consequences.

- Problem solving is the ability to identify, analyze, and resolve issues or challenges, using logical and creative thinking.
- Delegation is the ability to assign tasks and responsibilities to others, based on their skills, abilities, and availability, and to monitor and support their performance.
- Feedback is the ability to give and receive constructive and timely information about one's own and others' performance, behavior, and outcomes, and to use it for improvement and learning.
- Stress is the physical and psychological response to a perceived threat or challenge, which can affect one's health, well-being, and performance.
- Some of the common sources of stress are: work demands, personal issues, change, uncertainty, and conflict.
- Some of the common signs and symptoms of stress are: headaches, muscle tension, fatigue, insomnia, anxiety, irritability, depression, and low self-esteem.
- Some of the strategies to cope with and manage stress are: relaxation, exercise, meditation, breathing, time management, prioritization, goal setting, positive thinking, social support, and seeking professional help.

Management

Management is the process of planning, organizing, leading, and controlling the resources and activities of an organization to achieve its goals and objectives. Management can be applied to different levels (such as individual, team, department, or organization), domains (such as finance, marketing, human resources, or operations), and functions (such as planning, organizing, leading, or controlling).

Some of the main topics in management are:

- **Management functions:** These are the basic tasks that managers perform to ensure the effective and efficient functioning of an organization. They include planning (setting goals and strategies), organizing (arranging and allocating resources), leading (motivating and influencing others), and controlling (monitoring and evaluating performance).
- **Management skills:** These are the abilities and competencies that managers need to perform their functions effectively. They include technical skills (knowledge and expertise in a specific field or activity), human skills (ability to interact and communicate with others), and conceptual skills (ability to think analytically and creatively).
- **Management roles:** These are the specific behaviors and actions that managers perform in their positions. They include interpersonal roles (such as figurehead, leader, or liaison), informational roles (such as mon-

itor, disseminator, or spokesperson), and decisional roles (such as entrepreneur, disturbance handler, resource allocator, or negotiator).

- **Management styles:** These are the different ways that managers approach their functions, roles, and skills. They reflect the manager's personality, values, beliefs, and preferences. They include autocratic style (where the manager makes all the decisions and expects obedience), democratic style (where the manager involves others in decision making and encourages participation), and laissez-faire style (where the manager delegates authority and responsibility and allows freedom and flexibility).
- **Management theories:** These are the different perspectives and frameworks that explain and guide the practice of management. They include classical theories (such as scientific management, administrative management, or bureaucratic management), behavioral theories (such as human relations, motivation, or leadership), contingency theories (such as situational, systems, or contingency), and modern theories (such as learning, knowledge, or innovation).

Prescribed Books:

- Prescribed books are the books that are recommended by the syllabus or the instructor for a particular course or subject.
- Prescribed books are usually selected based on their relevance, quality, and availability for the course objectives and learning outcomes.
- Prescribed books may contain the core concepts, theories, principles, and examples that are essential for the course content and assessment.
- Prescribed books may also provide additional information, perspectives, and references that can enrich the learning experience and stimulate critical thinking.
- Prescribed books are not the only source of information for a course or subject. Students are encouraged to consult other sources such as journals, websites, podcasts, videos, etc. to supplement their learning and broaden their knowledge.
- Prescribed books may vary depending on the level, discipline, and institution of the course or subject. Some courses may have more than one prescribed book, while others may have none.
- Prescribed books may be available in different formats such as print, digital, or audio. Students should choose the format that suits their learning style, preference, and accessibility.
- Prescribed books may have different editions, versions, or translations. Students should check with their instructor or syllabus to ensure that they are using the correct or latest edition, version, or translation of the prescribed book.

**Technical Communication, (Second Ed.); O.U.P., Meenakshi Raman
& S.Sharma New Delhi**

- Technical Communication is a comprehensive textbook that covers the principles and practices of effective communication in engineering contexts.
- The book is divided into four parts: Part I introduces the basics of communication, such as language skills, listening skills, and non-verbal communication. Part II deals with the forms and functions of written communication, such as letters, memos, reports, proposals, and emails. Part III focuses on the oral communication skills, such as presentations, meetings, interviews, and group discussions. Part IV explores the emerging trends and technologies in communication, such as online communication, social media, and professional ethics.
- The book is designed to meet the needs of undergraduate students of engineering and other technical disciplines. It provides numerous examples, exercises, case studies, and illustrations to enhance the understanding and application of communication skills. It also includes a glossary of key terms and a list of references for further reading.
- The book is written by Meenakshi Raman and Sangeeta Sharma, who are both experienced teachers and researchers in the field of communication. They have authored several other books and articles on communication and related topics. They are currently associated with the Birla Institute of Technology and Science, Pilani, India.

2011

2011 was a year marked by significant events in various fields, such as politics, science, technology, culture, sports, and natural disasters. Some of the most notable events that occurred in 2011 are:

- The Arab Spring: A series of anti-government protests, uprisings, and civil wars that spread across the Middle East and North Africa, resulting in the overthrow of authoritarian regimes in Tunisia, Egypt, Libya, and Yemen, and the outbreak of civil wars in Syria and Bahrain. The Arab Spring was influenced by social media, economic grievances, and demands for democracy and human rights .
- The death of Osama bin Laden: The leader of the terrorist group Al-Qaeda, who was responsible for the 9/11 attacks in 2001, was killed by U.S. forces in a covert operation in Abbottabad, Pakistan, on May 2. His death was announced by President Barack Obama and sparked reactions of relief, celebration, and controversy around the world .
- The Fukushima Daiichi nuclear disaster: Following a magnitude 9.0 earthquake and a subsequent tsunami that hit Japan on March 11, the Fukushima Daiichi nuclear power plant suffered a series of meltdowns, explosions, and radiation leaks, resulting in the worst nuclear accident since Chernobyl in 1986. The disaster forced the evacuation of hun-

dreds of thousands of people, and raised concerns about the safety and environmental impact of nuclear energy .

- The independence of South Sudan: After decades of civil war and a referendum in January, South Sudan became the world's newest country on July 9, separating from Sudan. The independence was celebrated by millions of South Sudanese, but also faced challenges of poverty, violence, and unresolved disputes with Sudan over borders, oil, and citizenship .
- The Occupy movement: Inspired by the Arab Spring and the Spanish Indignados, the Occupy movement was a global protest movement that aimed to challenge social and economic inequality, corporate greed, and the influence of money in politics. The movement began with Occupy Wall Street in New York City on September 17, and spread to hundreds of cities around the world, with the slogan "We are the 99%" .
- The release of Minecraft: Minecraft, a sandbox video game that allows players to create and explore a virtual world made of blocks, was officially released on November 18, after being in development since 2009. The game became a cultural phenomenon, attracting millions of players, inspiring creativity, education, and entertainment, and becoming the best-selling video game of all time .
- The Norway attacks: On July 22, Norway witnessed the deadliest attack on its soil since World War II, when a right-wing extremist named Anders Behring Breivik detonated a car bomb in Oslo, killing eight people, and then opened fire at a youth camp on the island of Utøya, killing 69 more, mostly teenagers. The attacks shocked the nation and the world, and sparked debates on terrorism, extremism, and multiculturalism .
- The royal wedding: On April 29, Prince William, the second in line to the British throne, married Catherine Middleton, a commoner, in a lavish ceremony at Westminster Abbey, watched by an estimated two billion people around the world. The wedding was a global media event, generating interest, admiration, and criticism, and boosting the popularity of the British monarchy .
- The end of the Space Shuttle program: After 30 years of service, the Space Shuttle program, which was the first reusable spacecraft system, came to an end with the final flight of Atlantis on July 21. The program was responsible for launching and repairing satellites, conducting scientific experiments, and building the International Space Station, but also faced accidents, delays, and budget cuts. The end of the program marked a transition in the U.S. space exploration strategy, and opened opportunities for private and international cooperation .
- The death of Steve Jobs: The co-founder and former CEO of Apple, who was one of the most influential and visionary figures in the fields of personal computing, digital media, and consumer electronics, died of pancreatic cancer on October 5, at the age of 56. His death was mourned by millions of people, who paid tribute to his legacy of innovation, design, and entrepreneurship .

2. Business Communication for Managers, Payal Mehra, Pearson, Delhi, 2012.

- This is a book written by Payal Mehra, an Associate Professor of Communication at the Indian Institute of Management Lucknow.
- The book is published by Pearson Publishing and was released in February 2012.
- The book is a student-friendly, practical and example-driven book that gives students a thorough knowledge of business communication, covering all the major communication topics included in MBA syllabi across the country .
- The book begins by briefly analysing the various theories of communication. It demonstrates methods of effective communication in different business situations, such as interpersonal communication, group communication, cross-cultural communication, oral communication, written communication, and non-verbal communication.
- The book also covers topics such as business etiquette, listening skills, presentation skills, report writing, business correspondence, and crisis communication.
- The book includes numerous examples, case studies, exercises, and self-assessment tests to help students apply the concepts and skills learned in the book.
- The book is suitable for MBA students, managers, and professionals who want to improve their communication skills in the business context.

3. Personality Development, Harold R. Wallace et. al, Cengage Learning India Pvt. Ltd; New Delhi

- This chapter introduces the concept of personality and its development across the lifespan.
- Personality is defined as the distinctive and relatively enduring patterns of thoughts, feelings, and behaviors that characterize an individual's adaptation to the situations of life.
- The chapter discusses the major theoretical perspectives on personality development, such as psychoanalytic, trait, social-cognitive, humanistic, and behavioral approaches.
- The chapter also reviews the methods and tools for assessing personality, such as self-report inventories, projective tests, behavioral observations, and physiological measures.
- The chapter highlights the role of biological, environmental, and cultural factors in shaping personality development, as well as the influence of personality on various domains of life, such as health, work, and relationships.
- The chapter concludes with some suggestions for enhancing personality development, such as self-awareness, self-regulation, self-esteem, and self-actualization.

2006

- 2006 was a common year that started on a Sunday in the Gregorian calendar.
- Some of the major events that happened in 2006 are:
 - The Winter Olympics were held in Turin, Italy, from February 10 to 26.
 - The International Astronomical Union redefined the term “planet”, demoting Pluto to a dwarf planet on August 24.
 - North Korea conducted its first nuclear test on October 9, sparking international condemnation and sanctions.
 - Saddam Hussein, the former president of Iraq, was executed by hanging on December 30, after being convicted of crimes against humanity.
- Some of the notable people who died in 2006 are:
 - Steve Irwin, the Australian wildlife expert and television personality, who was killed by a stingray on September 4.
 - James Brown, the American singer and songwriter, who was known as the “Godfather of Soul”, who died of pneumonia on December 25.
 - Gerald Ford, the 38th president of the United States, who died of natural causes on December 26.
- Some of the popular films that were released in 2006 are:
 - Pirates of the Caribbean: Dead Man’s Chest, the second installment of the fantasy adventure franchise, starring Johnny Depp, Orlando Bloom, and Keira Knightley.
 - The Da Vinci Code, the mystery thriller based on the best-selling novel by Dan Brown, starring Tom Hanks, Audrey Tautou, and Ian McKellen.
 - The Departed, the crime drama directed by Martin Scorsese, starring Leonardo DiCaprio, Matt Damon, Jack Nicholson, and Mark Wahlberg.
- Some of the best-selling books that were published in 2006 are:
 - For One More Day, by Mitch Albom, a novel about a man who gets to spend one more day with his deceased mother.
 - The Road, by Cormac McCarthy, a post-apocalyptic novel about a father and son who travel across a devastated landscape.
 - The Kite Runner, by Khaled Hosseini, a novel about the friendship and betrayal of two boys in Afghanistan.

4. Practical Communication by L.U.B. Pandey; A.I.T.B.S. Publications India Ltd.; Krishan Nagar

- This is a book that covers the process and practice of communication skills in various contexts and situations.
- The book aims to help the readers develop their abilities to communicate effectively in oral and written forms, as well as to understand the barriers

and challenges of communication.

- The book is divided into four parts: Part I - Communication: An Overview, Part II - Oral Communication, Part III - Written Communication, and Part IV - Communication in Special Situations.
- Some of the topics covered in the book are:
 - The nature, scope, and functions of communication
 - The types, modes, and levels of communication
 - The principles, elements, and models of communication
 - The factors affecting communication and the ways to overcome them
 - The skills and strategies of listening, speaking, reading, and writing
 - The formats and styles of various forms of oral and written communication, such as letters, reports, proposals, memos, emails, etc.
 - The techniques and tools of presentation and public speaking
 - The etiquette and ethics of communication
 - The communication skills for group discussion, interview, meeting, negotiation, etc.
 - The communication skills for intercultural, interpersonal, and intrapersonal communication
 - The communication skills for crisis, conflict, and media communication

- The book is suitable for undergraduate and postgraduate students of engineering, management, and other professional courses, as well as for anyone who wants to improve their communication skills.

Delhi 2013

- Delhi 2013 refers to the Delhi Legislative Assembly election that was held on 4 December 2013, with the result announced on 8 December resulting in formation of the Fifth Legislative Assembly of Delhi.
- The election was contested by various political parties, such as the Bharatiya Janata Party (BJP), the Indian National Congress (INC), the Aam Aadmi Party (AAP), the Bahujan Samaj Party (BSP), and others.
- The election saw a high voter turnout of 66%, the highest for the state till date.
- The election result was a hung assembly, with no party getting a clear majority of 36 seats out of 70. The BJP won a plurality of 31 seats, closely followed by the AAP, which won 28 seats in its first election. The INC won only 8 seats, while the BSP and others won 3 seats.

- The election was followed by a political deadlock, as the BJP refused to form the government, citing lack of numbers, and the AAP sought public opinion on whether to form the government with the support of the INC or not. After getting a positive response from the people, the AAP formed a minority government with the outside support of the INC on 28 December 2013.
- The AAP government, led by Arvind Kejriwal as the Chief Minister, lasted for only 49 days, as it resigned on 14 February 2014, after failing to pass the Jan Lokpal Bill, an anti-corruption legislation, in the assembly. The state was then placed under President's rule until fresh elections were held in 2015.

5. Personality Development & Soft Skills, Barun K.Mitra, Oxford University Press, New Delhi, 2012.

- This is a textbook that aims to equip readers with the necessary skills required to be an effective communicator and a successful professional in the competitive world.
- The book covers various topics such as personality development, soft skills, communication skills, resume writing, group discussion, interview skills, presentation skills, business etiquette, and interpersonal skills.
- The book also provides practical tips, examples, exercises, self-assessment tests, and case studies to help readers apply the concepts and techniques in real-life situations.
- The book is written in a simple and lucid language, with a student-friendly approach and a contemporary outlook.
- The book is suitable for students of any discipline who are on the threshold of starting their careers, as well as young managers who have already had a taste of corporate life.

6. Public Speaking, William S. Pfeiffer, Pearson, Delhi, 2012

- This is a brief and practical book that offers immediate help in preparing and delivering all kinds of oral presentations .
- It covers the basics of public speaking, including selecting a topic, researching, organizing, and outlining a speech, as well as tips for delivery, visual aids, and handling anxiety.
- It also includes guidelines for various types of speeches, such as informative, persuasive, ceremonial, and impromptu, as well as special occasions, such as introductions, toasts, roasts, and eulogies.
- It provides examples, exercises, checklists, and sample speeches to help the reader apply the concepts and skills of public speaking.
- It is suitable for students, professionals, and anyone who wants to improve their communication skills and confidence in speaking in public.

7. Human Values, A.N. Tripathi, New Age International Pvt. Ltd. Publishers New Delhi, 2005.

- This book presents a holistic picture of the good life, which transcends the prevalent narrow understanding of what constitutes success, fulfilment and happiness in life .
- It offers a fresh interpretation of human values as the collectivity of all those values which enrich the different dimensions of life- material, societal, psychological, aesthetic, ethical and spiritual .
- A harmonious realisation of all these values helps us grow as truly and fully human persons.
- The book synthesises the insights of various disciplines such as philosophy, psychology, sociology, religion, art and literature to explore the nature, sources and dynamics of human values .
- The book also discusses the challenges and threats to human values in the contemporary world, such as consumerism, materialism, violence, terrorism, corruption, etc .
- The book suggests some ways and means to promote and cultivate human values in personal and social life, such as education, dialogue, spirituality, etc .
- The book is intended for undergraduate and postgraduate students of various disciplines, as well as teachers, professionals, researchers and general readers who are interested in the study of human values .

8. English Grammar & Usage, R.P.Sinha, Oxford University Press, New Delhi, 2005.

This is a book that covers the basic and advanced aspects of English grammar and usage. It is divided into 12 chapters, each focusing on a different topic. The book aims to help learners improve their accuracy and fluency in English. Some of the topics covered in the book are:

- The essay: kinds, structure, style, and format
- The letter: kinds, structure, style, and format
- The precis: definition, rules, and steps

The book also contains exercises, examples, illustrations, and appendices for reference and practice. It is suitable for students, teachers, and learners of English as a second language. It is one of the most popular and widely used books on English grammar and composition.

10. Soft Skills for Everyone. Jeff Butterfield, Cengage Learning India Pvt. Ltd; New Delhi 2017.

- This book is a guide to developing and enhancing the soft skills that are essential for personal and professional success in today's world.
- Soft skills are the interpersonal, communication, problem-solving, and self-management abilities that enable people to work effectively and harmoniously with others, and to achieve their goals.
- The book covers 10 key soft skills that are relevant for everyone, regardless of their background, education, or career path. These are:
 - Self-awareness: The ability to recognize and understand one's own emotions, strengths, weaknesses, values, and motives, and how they affect one's behavior and relationships.

- Self-management: The ability to regulate one’s emotions, impulses, and actions, and to cope with stress, challenges, and change in a positive and productive way.
 - Communication: The ability to express oneself clearly, confidently, and respectfully in verbal, nonverbal, and written forms, and to listen actively and empathetically to others.
 - Teamwork: The ability to collaborate effectively and cooperatively with others, and to contribute to a shared vision, goal, or outcome.
 - Interpersonal skills: The ability to build and maintain positive and trusting relationships with others, and to handle conflicts and disagreements constructively and diplomatically.
 - Diversity awareness: The ability to appreciate and respect the differences and similarities among people, such as their cultures, beliefs, values, perspectives, and experiences, and to adapt one’s behavior and communication accordingly.
 - Critical thinking: The ability to analyze, evaluate, and synthesize information from various sources and perspectives, and to apply logic, creativity, and judgment to solve problems and make decisions.
 - Learning skills: The ability to acquire, retain, and apply new knowledge and skills, and to seek feedback and improvement opportunities continuously.
 - Professionalism: The ability to demonstrate a positive and ethical attitude, a high standard of performance, and a commitment to excellence in one’s work and career.
 - Leadership: The ability to inspire, influence, and empower others to achieve a common goal, and to provide direction, guidance, and support as needed.
- The book provides practical tips, examples, exercises, and self-assessments to help readers develop and improve their soft skills, and to apply them in various personal and professional contexts.
 - The book also offers advice on how to showcase one’s soft skills to potential employers, and how to use them to advance one’s career and achieve one’s goals.
